

Wireless Configuration Steps

Mac OS X

Elizabethtown College

Revised: October 2, 2007

**** Please be sure to have the latest drivers installed for your wireless card. Go to your computer's manufacturer's website to obtain the latest drivers (www.apple.com). ****

(To find out the type of wireless card you have, open **System Preferences** and click **Network**.

Select your wireless card and click **Configure** to find out the type of card.)

1. If your wireless is not shown on the top menu bar, open up **System Preferences** and select **Network**.

- 2.
3. Select **AirPort** from the **Show** list.

- 4.
5. Make sure the "Show AirPort status in menu bar" is checked.
6. Select **Turn AirPort On** by selecting the option from the menu bar.

- 7.
8. Your computer may automatically log onto the "Guest" account.

9. Select **Open Internet Connect** from the menu bar.

10.
11. From the **Internet Connect** menu bar, select "New 802.1x Connection."

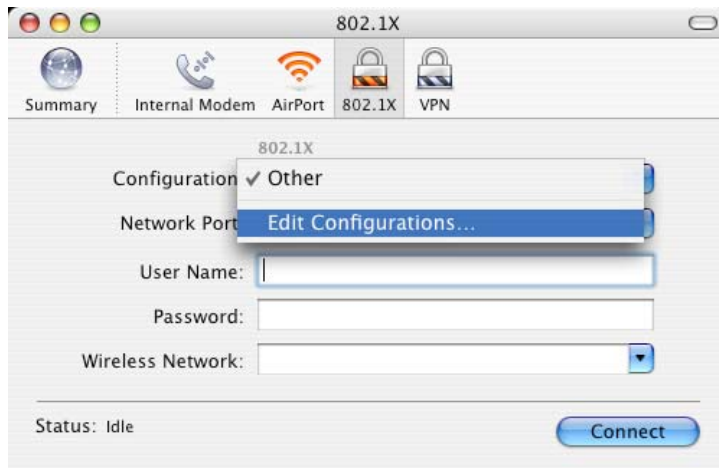

12.
13. Select the **802.1x** button on the **Internet Connect** dialog. Make sure the **Network Port** is set to **AirPort**.

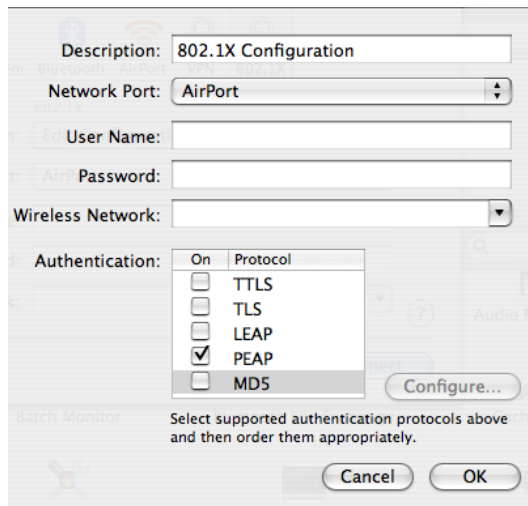

- 14.

15. Select “Edit Configurations” from the **Configuration** option.

- 16.
17. Make sure that only “PEAP” is selected for **Authentication**. Do not enter information into any of the other dialogs.

- 18.
19. Click **OK**.
20. Enter your **User Name** and **Password**. Select “ETOWN_USER” from the **Wireless Network** list.

- 21.

22. Click **Connect**. There will probably be an error.
23. Select "Edit Configurations" once again. You will be asked to save your settings. Save them. Click **OK**.
24. Click **Connect**. You may be asked to approve a key certificate. Click **Continue**. You should now be connected.

Register Your Computer

1. Go to <http://update.etown.edu/registration/> to download any security updates and install Symantec Antivirus to protect your computer.
2. Follow the on screen instructions to complete the registration process and validate your computer.

Elizabethtown College Computer Registration
<p>Before you Begin The Department of Information & Technology Services has instituted a registration process for all computers on campus to help control the problems with viruses and vulnerable computers found in the past few years. You must complete the registration process before accessing network resources.</p> <p>Step 1) Patch your Computer The best step against viruses is to make sure your computer is fully patched with the latest updates.</p> <ul style="list-style-type: none"> ▪ Vista Only - Go to http://update.microsoft.com/ and download all critical updates. ▪ XP Only - If you are unsure if you have Windows XP Service Pack 2, click on "Start" then "Run". Enter "winver" (without the quotes) and press "OK". A window will pop-up with the service pack you have installed. ▪ XP Only - If you do not have Windows Service Pack 2, click here to download the service pack. ▪ XP Only - If you have Windows Service Pack 2, go to http://update.microsoft.com/ and download all critical updates. <p>Step 2) Protect your Computer Every computer on the campus network is required to run Symantec Antivirus Corporate Edition. To install this software, visit: http://update.etown.edu/symantec.html</p> <p style="text-align: center;">Before continuing to Step 3, please ensure you have this software installed and the virus definitions are up to date. For instructions on updating your anti-virus, please visit http://update.etown.edu/symantec.html</p> <p>Step 3) Install Anti-Spyware ITS requires all student computers to run the Corporate Edition of Lavasoft's Ad-Aware. To install this software, visit: http://update.etown.edu/antispyware.html</p> <p style="text-align: center;">Please ensure you are running an up-to-date version of this software before continuing to Step 4. Help for this process can be found on the antispyware page at http://update.etown.edu/antispyware.html.</p> <p>Step 4) Register your Computer Computers connected to the network must be registered. Your computer must comply with steps one through three before you will be able to register your machine. Your computer will also need to be running Windows 2000, Windows XP, or Windows Vista. Failure to register will result in your computer being blocked from the network. To register, visit: http://update.etown.edu/register.html ATTENTION: After you complete this step, you will need to return to this page (http://update.etown.edu) to complete steps 5 and 6.</p> <p>Step 5) Map your Network Drives Click on http://update.etown.edu/mapnetworkdrives.exe to get the map the network drives program, select "Save", and put the file on your desktop. To map the drives, double-click on this program and enter your JAYNET username and password.</p> <p>Step 6) Restart your Computer In order for these changes to take affect, you MUST restart your computer. If you are not able to visit websites outside of the college, please make sure you restart your computer.</p> <p>More Information Please note that continuing to keep your computer up-to-date is an essential part of protecting your computer and the entire campus network. It is important to periodically check for Updates or even set computers to automatically download and install the updates. Users should also scan their computers periodically for viruses using the Symantec Antivirus Corporate Edition.</p>
