

Hello Alumni/ae of Physics and Engineering:

OCTOBER 2003

Cooperation, collegiality, creativity, concern for each other, a sense of “family,” and plain old-fashioned hard work characterized your department while you were here.

***Names have changed***

from (you fill in the names when you were here)  
to Ferruzza-Gaffney-Salem-Stuckey-Thompson in the 1990s  
to DeGoede-Ferruzza-Gravé-McBride-Scanlin-Stuckey

***and the numbers of students have changed***

from (you fill in the number of department students when you were here)  
to 10 to 20 in the early 1990s  
to 70 to 80

***but the spirit remains the same.***

The department extends a cordial invitation for you to participate in this year’s Homecoming. Details may be found at: <http://www.etown.edu/alumni/Homecoming.asp>

**Our normal round table discussion (October 18, Saturday, 3-4:30pm) will be in the E-lab (Esbenshade 166).** Refreshments will be available (on the second floor of Esbenshade, near the “bridge” to Musser) from about 2:45pm. Feel free to bring food from the second floor down to E166.

**Floor plans for the Science, Math, and Engineering Center will be available.** (Since Trustees want “cash in hand” before starting this big project, the start date has been delayed until Summer 2005.) *I have never asked you to make donations, and I won’t start now. However, when you are approached about supporting this significant project, please give it serious attention.*

**As always, we – your faculty in Physics and Engineering – count it a privilege to be fully engaged in educating the next generation of physicists and engineers.**

We look forward to seeing you (or hearing from you).

David Ferruzza  
Chair, Physics and Engineering

++ If you can’t make it this year, perhaps you can send a brief update on your activities.
