TOTAL: 44 credits

One course above must be Writing and Research Intensive (WRI):

WRI Course ID: _____

Term: _____

ADDITIONAL REQUIREMENTS:

- Students must take 10 courses in 8 Areas of Understanding in addition to First Year Seminar and First Year Colloquium.
- First Year Seminar and Colloquium must be taken during the first semester of a student's enrollment at the College.
- Students must take at least one Writing and Research Intensive Course which can be at either the 100 or 200 level
- There is no minimum number of 200 level core courses required.
- In the Natural and Physical Sciences AU, students must take the two required courses in different disciplines. (Disciplines are indicated by the course prefix.) Students must complete at least one laboratory science course.
- Students may double-count any major or minor course that is also a core course.
- Students are required to complete the appropriate level of mathematics, English and modern language courses as determined by the College.
- Seniors may enroll in Core Program courses to complete Core, Major or Minor requirements as needed; however, seniors may not enroll in Core Program courses for elective purposes until all enrolled underclass students have had the opportunity to select courses during the official registration periods. (In this context seniors include both students of senior status and juniors who will have achieved senior status at the completion of the current semester.)
- Students may petition the Academic Standing Committee to waive a particular Core Program requirement or to provide a substitute for an existing Core Program requirement.
- The Core program may be satisfied in its entirety by transfer courses (i.e., there is no residency requirements for the Core).
- Transfer students who transfer fewer than 24 credits of course work from another college are required to complete the First Year Seminar and Colloquium.
