Actuarial and Analytics Internship

The Actuarial and Analytics Internship Program provides qualified students who are currently enrolled in an undergraduate program an excellent opportunity to gain business experience, receive valuable actuarial and analytics training, and learn first-hand about the many opportunities available in the property casualty industry. Interns have challenging assignments that utilize and develop their technical skills as well as their overall business knowledge.

Requirements

- Preferred cumulative GPA of 3.2 or greater
- Motivation to succeed
- Strong analytical and communication skills
- Working knowledge of Microsoft Office
- Extracurricular involvement on campus or in the community
- Demonstrated leadership experiences/skills

Suggested majors

- Actuarial science
- Computer science
- Economics
- Mathematics
- Physics
- Statistics
- Other analytic majors will also be considered

Location

Internships will be performed at the corporate offices located in Lititz, Pennsylvania.
