Occupational Therapy Graduate Research Symposium
2020

Embracing the Future: Empowering Occupational Therapy Through Research

April 20, 2020
Sponsored by
Pi Theta Epsilon
Upsilon Chapter
The Occupational Therapy Faculty and Graduate Students welcome you to

The Occupational Therapy Graduate Research Symposium 2020

Elizabethtown College
April 20, 2020

5:00-5:30 Opening Remarks
Nancy Ann Carlson, PhD, OTR/L
Associate Professor, Occupational Therapy

Keynote Speaker:
Kelly Downs Upton ‘09, MS, OTR/L

Masters Project Presentations will be held concurrently in virtual format via the Zoom links listed in each Graduate Project

Recording, downloading and/or photographing of the OT Graduate Research Symposium events is strictly prohibited.

SPECIAL NOTE: CEU’s will be awarded to attending clinicians who have registered for this Graduate Symposium on the evening of April 20, 2020, only.

| 5:40-6:10 | **Clinical Reasoning of Occupational Therapy Practitioners: Upper Extremity Orthotics in the Acquired Brain Injury Population**  
Graduate Students: Madelyn Baker, Abigail Drumheller, Megan Elmer, Kristen Klose  
Faculty Mentor: Gina Fox, OTD, OTR/L  
**Purpose:** The purpose of this study is to understand occupational therapy practitioners' clinical reasoning process when recommending orthotics and devices in the acquired brain injury population. We aim to identify and analyze the factors which contribute to this reasoning process. Identifying these factors would be helpful to encourage consistent care in upper extremity management.  
**Research Question:** What factors influence occupational therapy practitioners’ clinical reasoning when recommending orthotics and devices for management of upper extremity motor impairments in clients with acquired brain injury?  
Join us via ZOOM LINK: [https://etown.zoom.us/j/94341663696](https://etown.zoom.us/j/94341663696) | .50 |
| 5:40-6:10 | **Interoception: Analysis of Caregiver and Child Experiences**  
Graduate Students: Erika Cole, Rebecca Crammer, McKenna Stengel  
Faculty Mentors: Kerri Hample, OTD, OTR/L, FMCHC, and Kelly Mahler, MS, OTR/L  
**Purpose:** Explore the differences and similarities between caregiver and child experiences regarding interoception.  
**Research Questions:**  
1. Are the Caregiver Questionnaire for Interceptive Awareness and Interoceptive Awareness (IA) Interview reliable measures of interoception in children?  
2. What is the correlation between the Caregiver Questionnaire for Interceptive Awareness and Interoceptive Awareness (IA) Interview?  
3. What is the correlation between BRIEF-2® and Caregiver Questionnaire for Interoceptive Awareness?  
4. Is there congruence between the change scores on the Caregiver Questionnaire for Interceptive Awareness and the change scores of the Interoceptive Awareness (IA) Interview?  
Join us via ZOOM LINK: [https://etown.zoom.us/j/96130936598](https://etown.zoom.us/j/96130936598) | .50 |
| 5:40-6:10 | **The Role of Occupational Therapy Practitioners in School Recess**  
Graduate Students: Amber Burd, Nichole Campbell, Meghan Chemidlin  
Faculty Mentor: Judy Beck Ericksen, Ph.D., OTR/L  
**Purpose:** The scope of school-based occupational therapy includes the opportunity to address play and leisure activities such as recess. However, there is limited current research describing occupational therapy practitioners’ (OTP) role in this activity. The purpose of our study is to explore the perceptions of school-based OTPs regarding their role in the activity of daily recess, in order to better understand the contributions they have or can have with this activity.  
**Research Questions:**  
1. What are OTPs’ perceptions of recess as a school activity?  
2. What roles do OTPs have regarding a student’s participation in recess?  
3. What are OTPs doing to address recess in their everyday practice?

| 6:20-6:50 | **Exploring the Efficacy of Sensory-Based Modalities on College Students’ Health and Well-Being: A Qualitative Inquiry** | Caitriona Eells, Joshua Reed, Olivia Stekervetz | Terri Reichley Dennehy, D.Ed, OTR/L | To understand the experiences/perceptions of full time, undergraduate college students as they utilize available sensory-based modalities to promote occupational health and well-being in the occupations of health management, academics, and sleep. | 1. What aspects of health and wellness, if any, impact students’ desires to engage in healthy occupational behaviors?  
2. What specific sensory modalities, if any, were self-selected to address individuated health and wellness needs?  
3. What impact, if any, did the self-selected sensory modalities have on perceived stress as related to the identified occupations of health management, academics, and sleep? | [https://etown.zoom.us/j/91713289726](https://etown.zoom.us/j/91713289726) | .50  |
| 6:20-6:50 | **Factors Associated with Occupational Performance of Young Adults with Congenital Heart Defects** | Alexandra Katsock, Abigail Romberger, Natalie Watt | Deborah Waltermire, DrPH, OTR/L | To identify and understand the factors associated with occupational performance of young adults with CHD. | 1. What factors/characteristics are associated with higher scores on the Occupational Self Assessment (OSA), indicating perceived occupational competence?  
2. What are the occupational performance needs of young adults who are transitioning into adulthood?  
3. What role could occupational therapy play in supporting lifelong participation and well-being of young adults with CHD? | [https://etown.zoom.us/j/97685554052](https://etown.zoom.us/j/97685554052) | .50  |

| 7:00-7:30 | Enhancing Child and Family Engagement in Social and Community Participation: An Early Intervention Sensory Motor Group Protocol | Allison Eveler, Amy Gage, Olivia Lee, Samantha Sheronas     | Diane Martin, OTD, OTR/L | To develop an early intervention sensory motor play group protocol aimed at enhancing infant social participation in family and community engagement. | 1. How does sensory motor play impact social and community participation?  
2. What elements should be included in an early intervention sensory motor play group protocol? | https://etown.zoom.us/j/99412352843                                      |
| 7:00-7:30 | Media Portrayal of Occupational Therapy 2015-2019: A Content Analysis | Amy Blum, Jennifer Jackson, Melissa Ziegler      | Judy Beck Ericksen, Ph.D, OTR/L | The purpose of this study is to explore portrayals of occupational therapy in print media to understand the image of the profession being disseminated to the public. | 1. What information about occupational therapy is available or disseminated to the public through print media?  
2. What key features or characteristics about occupational therapy are conveyed to the reader?  
3. Does the information from print media accurately reflect a setting-specific definition of occupational therapy, and if so, how?  
4. Does information from print media outlets differentiate the profession of occupational therapy from other professions, and if so, how? | https://etown.zoom.us/j/96275648935                                      |
| 7:00-7:30 | Modifying 3D Printed Finger Design to Enhance Purposeful Activity | Gina Feeney, Angeline Springer, Cristina VanBrocklin, Hannah Winters | Daniel Panchik, D.Sc., OTR/L | The purpose of our research is to explore the ease of using an open-source 3D printed design in the development of a digit prosthetic device and to evaluate the effects of a 3D printed digit prosthetic on purposeful activity for individuals with digit amputations. | 1. What is the ease of developing a digit prosthetic device using an open-source 3D printed design?  
2. What is the ease of adapting a 3D printed digit prosthetic design to meet a client's specific task needs? | https://etown.zoom.us/j/98557383434                                      |
<p>| 7:40-8:10 | Development of a Sensory Assessment for the Work Environment | Rebekah Bolton, Hannah Burleigh, Abigail DiCiano, Kelly Nguyen | Deborah Waltermire, DrPH, OTR/L | The purpose of this study is to begin the process of developing an environmental assessment of sensory characteristics for adults within the work environment diagnosed with various mental health disorders to enhance occupational performance. | What is the process and content needed to develop a tool that accurately assesses sensory characteristics within an individual’s work environment? | <a href="https://etown.zoom.us/j/91087116214">https://etown.zoom.us/j/91087116214</a>                                      |</p>

</tbody>
</table>
|              | **Research Questions:** 1. What are the attitudes and opinions of professionals who work with pregnant women with Opioid Use Disorders?  
|              | 2. What is the lived experience of a mother with Opioid Use Disorder who receives these services?  
|              | 3. What role can occupational therapy play in providing care to mothers with Opioid Use Disorder? |
|              | **Join us via ZOOM LINK:** [https://etown.zoom.us/j/94790888739](https://etown.zoom.us/j/94790888739) |
| 7:40-8:10    | **Utilizing Action Research: Empowering Occupational Therapy Practitioners in Fieldwork Education**                           | .50 |
|              | Graduate Students: Rebecca Coder, David Van Aken, Emma Varrato                |
|              | Faculty Mentor: Christine Achenbach, M.Ed., OTR/L                            |
|              | **Purpose:** This study aims to empower OTPs and explore pragmatic, educational solutions that can promote change in openness to mentoring OTP students. Additionally, the study aims to demonstrate the importance and challenges of being a fieldwork educator in the current clinical environment.  |
|              | **Research Questions:** 1. In what ways do clinicians prefer to learn about educational resources to be adequately prepared for becoming a FWEd?  
|              | 2. Can a journal club promote adequate preparedness for the FWEd role? If so, how?  
|              | 3. Does interacting with the literature provided in a journal club change the likelihood of becoming a FWEd? If so, how? |
|              | **Join us via ZOOM LINK:** [https://etown.zoom.us/j/97133425375](https://etown.zoom.us/j/97133425375) |
| 8:20-8:50    | **Establishing Validity for the BBCSS Eating and Feeding Behaviors Subscale: Promoting Interdisciplinary Utility**             | .50 |
|              | Graduate Students: Giovanna Martinez, Elizabeth Mazer                        |
|              | Faculty Mentor: Nancy Ann Carlson, PhD, OTR/L                                 |
|              | **Purpose:** The purpose of this study is to evaluate the psychometric properties of the Brain-Body Center Sensory Scales; Eating and Feeding Behaviors Subscale. Specifically, we will analyze the validity as it pertains to the differences between typical children and clinically diagnosed children. |
|              | **Research Questions:** 1. How do the item scores within the Brain-Body Center Sensory Scales’ (BBCSS) Eating and Feeding Behaviors Subscale differ between typically developing children and children with clinical diagnoses?  
<p>|              | 2. How do the items on the BBCSS capture the concepts of ‘eating and feeding’ compared to theoretical constructs seen in clinically diagnosed children? |
|              | <strong>Join us via ZOOM LINK:</strong> <a href="https://etown.zoom.us/j/93572213983">https://etown.zoom.us/j/93572213983</a> |</p>

This is the sixteenth anniversary of the 
Occupational Therapy Graduate 
Research Symposium.

No effort of this magnitude is possible as a solitary pursuit.
To that end, please thank the OT Graduate Research Symposium Committee for their efforts in making this celebration of scholarship and occupational therapy possible.

Committee Chair  
Nancy Ann Carlson, PhD, OTR/L

Administrative Assistant  
Jean Dietrich
