

## **Campus Core Access Policy**

The Purpose of the Campus Core Access policy is to limit vehicular traffic in the area between the High Library, the east side of the Brossman Commons, the BSC, Zug, and the Academic Quad for the safety of students, faculty and staff, and for the preservation of the grounds and landscape.

College faculty, staff and outside vendors are not permitted to drive in this area on campus without permission by Facilities Management, Dining Services or Campus Security. Before access is permitted the sponsoring department will check 25Live to assure no interference with events scheduled for the Brossman Commons Terrace or other areas of campus core.

Except for emergency vehicles, no vehicular traffic is permitted in this area from 10am to 2pm. Vehicular access is permitted, with approval of Facilities Management for the following:

- To drive heavy equipment into the center of campus for maintenance, event support and equipment movement. Vehicles must be moved out of the area as soon as equipment is unloaded, or the maintenance task has been completed.
- To safely move heavy items into and out of buildings.

Whenever possible, college golf carts should be used to access the center of campus. As with all other areas of campus, vehicles and equipment must remain on the pavement and stay off the turf. Permission to operate any vehicle or equipment on the turf shall only be granted by the Director of Facilities Management or the Project Manager.

Outside contractors and college staff who do not comply with this policy may be subject to warnings and/or tickets under the Campus Vehicle use and Parking Regulations policy. Questions can be directed to Facilities Management at 717.361.1408, Campus Security at 717.361.1263 or Dining Services at 717.361.1158.
