Connecting to the Elizabethtown College
Guest Wireless Network

A few simple steps will allow you to connect your Windows 7 computer to the Guest network we have set up at Elizabethtown College. As a guest of the college, you are permitted to use a specific username and password for this purpose. Please contact the Elizabethtown College Help Desk (x3333 or helpdesk@etown.edu) to receive this username and password on a coupon page and follow the instructions below to connect.

1. In your system tray (the lower right-hand corner of your screen) you should see an icon for networking. **Single-click** this icon to bring up a quick connection menu.

2. Windows will detect any wireless networks in range, which will include the EC_Guest_Pass network and our secure Etown_User network. The latter is required for students and employees of the college only. As a guest of the college you will use EC_Guest_Pass.
3. **Single-click** EC_Guest_Pass, then click connect.

4. You will get a notification that additional log on information may be required to connect.

5. **Open** a web browser (ex. Internet Explorer). After a moment it will display a page to enter your credentials. This is the username and password provided by the Help Desk.
6. Enter the username and password from the Help Desk coupon and click **Login** to connect.
