

IT Matters

Elizabethtown College Information & Technology Services Student Newsletter – March 7, 2016

Don't be Snowed by Ads and Viruses

Is your computer safe from viruses? How do you know? Don't Be Snowed by pop-ups or fake ads or links. Find out how to protect your computer with this article.

[Don't Be Snowed »](#)

Why Not To Go Wireless

Waiting for your Netflix to buffer? That's not what we had in mind either. Help ITS catch the Wi-Fi monster red handed. Check out this article to find out who is hogging the Wi-Fi.

[Keep up the Speed »](#)

Preventing Device Theft

Everyone thinks it won't happen to them, but device theft happens. Don't get caught off guard. Read this article and make sure that you are prepared to protect your devices.

Student Spotlight: Matthew Sternberg

Each issue of IT Matters will feature a different staff member as a way of highlighting the members of the department and thanking them for their contributions to the ITS team.

Matthew is a Class of 2016 Information Systems major with a Business minor. His responsibilities with ITS include monitoring the Help Desk ticket system, setting up tech equipment for school sponsored events, and running podium checks around campus. He likes to ensure that the computer labs in the academic buildings around campus are always in tip-top shape for students to use. When he's not sitting behind the Help Desk, he's playing tuba in the Symphonic Band or playing a tabletop game like Dungeons and Dragons with his friends. Matthew also enjoys playing video games on his PC and PlayStation 3. Stop by the Help Desk in Nicarry 125 and say hello!

Cool Tech Startups

The next big thing almost always starts out as a small thing waiting to find support and grow. Check out this article to find out what could be the next big thing in social media or tech. Maybe it will be WiFi in an old car, or Snapchat's new competitor. Who knows, soon these tech startups could be huge.
