

### Second Major/Minor Predominate Prefix Petition

Second majors and minors represent additional knowledge and interest in areas outside the first major. Therefore, second majors and minors must be selected in disciplines outside the first major, and additional minors must be selected in disciplines outside the first minor. Major and minor disciplines are determined by the predominant course prefix of the major/minor course requirements. For secondary education majors, the major subject area is considered to be the discipline of the major.

If you would like to pursue a second major or a minor that does not meet the foregoing disciplinary criteria, in terms of predominate course prefix, then you may submit a written appeal explaining (a) why you are seeking to pursue the majors/minors in question and (b) how you see the two programs as distinct disciplines. Please submit this appeal to (1) the Dean(s) of the majors/minors concerned and, provided they approve, (2) the Dean for Academic Affairs & Faculty Development.
