ELIZABETHTOWN HISTORY: CAMPUS AND COMMUNITY

Fifty Years of Preservation and Perseverance in Marietta, Pennsylvania:
The Aftermath of Hurricane Agnes (1972-2022)

Ryan Robert Kilgour

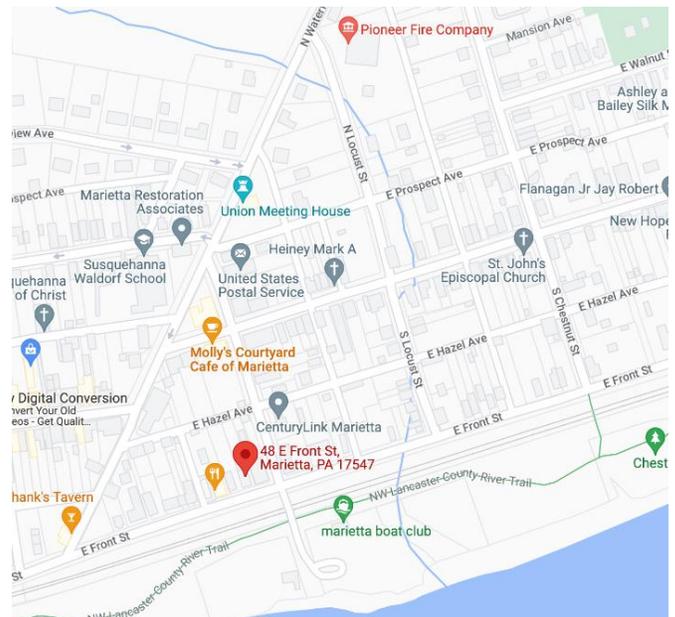

18 April 2023

Professor Jean-Paul Benowitz

Elizabethtown College

Stahl-Sagris House

48 East Front Street Marietta, Pennsylvania 17547

Abstract:

Constructed 1844 in the Federal style by lumber merchant Jacob Stahl (1796-1884) and Anna Stahl (1803-1890) for their son George Washington Stahl (1823-1866) and daughter-in-law Sarah E. Longnecker (1828-1909) this was the home of their son Edmond L. Stahl (1848-1900) and daughter-in-law Elizabeth E. Stahl (1845-1931). Jacob Stahl's daughter Mary Jane Stahl (1826-1912), married Abraham N. Cassel (1810-1895), thus connecting the lumber families. To build this house, Jacob Stahl razed a timber frame shop on the lot. Jacob Stahl lived next door and owned the home, which he willed to his grandson Edmond L. Stahl. This was the home of James Sagris, art dealer, conservator, and ceramic restorer who planted 150 Kwanzan cherry trees along Front Street. The Sagris Cherry Trees are the same variety planted in Washington, D. C.

Prologue:

It has been 50 years since Hurricane Agnes (1972). Many historically significant properties in the Borough of Marietta, in Lancaster County, were almost obliterated. In June 1972, tropical cyclone Agnes made its way from the Yucatán Peninsula up the U. S. Atlantic Seaboard, shifting its strength as it advanced over land and sea. Although the storm touched communities along its entire stretch, it had its greatest impact in Pennsylvania, where it caused an estimated \$2.1 billion in damage, destroying houses and infrastructure and leaving thousands of people homeless. The event was called “Pennsylvania’s most devastating natural disaster.”

The disastrous impact of Agnes spread to many of Pennsylvania’s neighboring Middle Atlantic states, New York, Maryland, and Delaware among them. Still, it was in Pennsylvania, especially along the branches of the Susquehanna River, where the damage was the worst, at least in records dating back to 1784.

Agnes was a “transitioning storm,” meaning the hurricane changed from having the strongest winds and rain wrapped tightly around its core, a tropical cyclone structure, to be similar in structure to a low-pressure system typically affecting the region but much, much stronger. In its tropical and transitioned phase, Agnes comprised many tens of thunderstorms, much larger than a single thunderstorm. This transition drove the volume of rain resulting in devastating flooding.

According to the National Oceanic and Atmospheric Administration, in a post-storm evaluation in 1973, Agnes’ “slow development and movement permitted a large amount of moisture to be transported from the deep tropics into the storm system. This accounts for the extraordinarily heavy precipitation associated with the storm from Cuba through the eastern tier of states from Florida into New York.”

According to the Pennsylvania National Guard, an estimated 55,000 homes were damaged or destroyed, which throughout the post-flood summer of 1972, handled relief operations in thirty-five of Pennsylvania’s sixty-seven counties. Farm crops were damaged, and according to the Susquehanna River Basin Commission, more than 2,700 businesses and one hundred and fifty factories were wiped out (resulting in 50,000 people out of work in the immediate aftermath of the storm). One hundred twenty-six bridges were destroyed. Twenty-four Pennsylvania National Guard units were activated for search and rescue duty, and armories around the state were being opened to serve as emergency shelters. The Pennsylvania National Guard reported the deaths of forty-nine individuals attributable to Agnes.

Nearly 1,000 Marietta residents fled their homes as the Susquehanna River swelled and flooded the town. The river reportedly rose eight inches every hour, reaching a record height of thirty-two feet on Friday. Agnes damaged an estimated 1,500 to 1,800 buildings and homes in Lancaster County. By Sunday, June 25, an estimated 50,000 homes were abandoned across Pennsylvania. Less than one percent of homeowners carried flood insurance on their houses at the time.

Eleven years prior, in 1961, The Marietta Recreation Association hosted an event called “A Day in Marietta Homes,” held on 13 May 1961, showcasing the rich variety of historic architecture and telling the stories of the historical significance of these properties. One year later, on May 19, 1962, the second annual “A Day in Marietta Homes,” a historic architecture house tour, was held in conjunction with celebration events for the Marietta Sesquicentennial (1812-1962). Planning for the Marietta Sesquicentennial (1812-1962) started with a committee on Monday, 11 September 1961.

Civically engaged residents of the Marietta Borough who organized The Marietta Sesquicentennial (1812-1962) celebration events and the two annual historic architecture house tours; chartered, on 23 June 1965, a non-profit organization named the Marietta

Restoration Associates, Inc. The purpose of this grassroots community organization was “...to promote, encourage, and conduct the restoration, development, and preservation of the historical, cultural, and aesthetic aspects of the Borough of Marietta, and vicinity thereof, and to do all things necessary, proper, and incidental to the accomplishment of such purpose.”

In 1965 the Historic Preservation Trust of Lancaster was created to “stem the rapid destruction of historic properties in Lancaster County,” the Historic Preservation Trust of Lancaster County’s mission is to “encourage and facilitate historic preservation throughout the county. The Trust has preserved more than three dozen important Lancaster County landmarks and provided advice, assistance, and guidance in protecting others.”

In the autumn of 1966, President Lyndon Baines Johnson (1908-1973), signed into law, on 15 October 1966, The National Historic Preservation Act to preserve historic and archeological sites in the United States by creating The National Register of Historic Places, the List of National Historic Landmarks, and State Historic Preservation Offices.

In 1966 Edward F. LaFond, Jr. was appointed the Field Curator of the Pennsylvania Bureau of Historic Sites and Properties in Harrisburg and the State Preservation Officer for the Pennsylvania Register of Historic Sites and Properties.

In December 1966, the Marietta Restoration Associates, Inc. resumed the annual historic house tour calling the event "Christmas by Candlelight," later known as "Candlelight Tours of Marietta.

In 1969, a History Major from Elizabethtown College, Carl H. Doan, Class of 1973, was taking courses about local history and historic preservation from Professor Scott T. Swank, Elizabethtown College Class of 1964, who taught at the college from 1966-1974. Professor Swank lived in Marietta and owned and restored several historic properties in the borough.

Professor Swank secured for his student, Carl Doan, the very first college student internship working with the recently established State Historic Preservation Office, in Harrisburg, with Edward LaFond. Until he graduated from the College in 1973, Doan conducted National Historic Preservation Act Section 106 Reviews of Marietta ten years before Marietta was listed as a National Historic District.

In the summer of 1973, when Carl Doan graduated from Elizabethtown College, Hurricane Agnes hit from 14 June through 6 July 1972. In the aftermath of this tropical cyclone, residents of Marietta, particularly through the leadership of the Marietta Restoration Associates, Inc., saved most of the historic properties and launched a nationally recognized historic preservation initiative that continued to sustain the local economy.

On 18 July 1978, the Borough of Marietta was designated a National Historic District. On 17 August 1984, the Marietta National Historic District was expanded. On 26 December 2005 the Chickies National Historic District was established to incorporate the former lumber, iron, and steel manufacturing-built landscape and ruins adjacent to the Marietta National Historic District.

Within the Marietta National Historic District, three properties are listed on the National Register of Historic Places: New Haven Counting House, 104 East Front Street, listed on 7 September 1979; the Silk Mill Condominiums, 50 North Pine Street, listed on 27 June 1980, and the Linden House, 606 East Market Street, listed on 6 January 1983.

In the spring semester of 2019, Honors students enrolled in HON-PHS 201 - HNR Elizabethtown History: Campus and Community, taught by Professor Jean-Paul Benowitz conducted National Historic Preservation Act (NHPC) Section 106 Reviews documenting historic properties in the National Historic District of Marietta, Pennsylvania. On two occasions students presented their research findings: Elizabethtown College Scholarship and Creative Arts Day SCAD16 April 2019 and Marietta Day Community Festival 11 May 2019 in Marietta.

During the summer of 2019, as a Summer Scholarship, Creative Arts and Research Projects (SCARP), Honors student Kyle C. Cappucci plotted the student scholarship on an ArcGIS map, available online. This ongoing project will include: every house/building in Marietta listed on the: National Historic Register (NRHP), Historic Preservation Trust of Lancaster County (HPTLC), Historic Preservation Trust of Lancaster County Watch List, Marietta Historic District (MHD), Chickies Historic District (CHD) to be plotted on the ArcGIS maps.

To illustrate which historic properties, in the Marietta National Historic District are plotted on the ArcGIS map for SCARP 2019, Cappucci designed signs, 8.5x11 printed as window clings to be displayed inside a windowpane of each of the houses and properties on his inventory of historically significant properties in Marietta. These signs contain information about the history and the families directly related to the property.

Cappucci built on the research conducted during the spring 2019 semester and expanded the project's scope. Cappucci utilized primary sources found in archival collections and historic collection libraries, conducted oral history interviews, worked with government documents such as deeds, tax records, and property assessment reports, consulted with professional historians in academia, state, and federal agencies, and compared primary sources to secondary sources. The repositories for sources used in his research was a mixture of print records in

libraries, archives, museums, historic sites, and private collections as well as electronic and digital repositories. Cappucci worked carefully with representatives from the Marietta Restoration Associates, Inc., Marietta Historic District, Marietta Borough Council, Social Enterprise Institute at Elizabethtown College, RiverStewards, and Susquehanna Riverlands.

Cappucci's research about the historical significance of Marietta, Pennsylvania, published through the ArcGIS map, contributed to the work of RiverStewards and Susquehanna Riverlands to have the Susquehanna Pennsylvania Heritage Area designated simultaneously as a National Heritage Area. The Pennsylvania Department of Conservation and Natural Resources (DCNR) administers twelve (12) Pennsylvania Heritage Areas. The Pennsylvania Heritage Areas Program is a multi-region asset-based economic development program rooted in the commonwealth's rich natural, cultural, and industrial history. Heritage Areas create cross-sector partnerships, enhancing a region's "sense of place" and strengthening regional economies. These partnerships create vibrant, livable communities attracting private investment and housing the products and places driving Pennsylvania's tourism industry. Five of Pennsylvania's Heritage Areas share a national designation through the National Park Service. Pennsylvania has more federally designated Heritage Areas than any other state, a testament to this commonwealth's important role in developing the United States and globally. The Economic Impact of Pennsylvania Heritage Areas report from the Center for Rural Pennsylvania found in 2014: Tourists spent an estimated 7.5 million days and nights in Pennsylvania's Heritage Areas, purchasing more than \$2 billion worth of goods and services; 70 percent of this spending was purely reliant on heritage-related attractions; the total contribution of heritage visitor spending to the state economy was 25,708 jobs and \$798 million in labor income.

This summer, 2022, the leadership for the Susquehanna National Heritage Area just released their draft of a management plan for the Susquehanna National Heritage Area. Lancaster and York Counties were officially designated as a Susquehanna National Heritage Area and America's 55th National Heritage Area on 12 March 2019, when the John D. Dingell, Jr. Conservation, Management, and Recreation Act was signed into law in Washington, D. C. The National Historic District of Marietta, PA is part of the SNHA which involves collaboration with the National Parks Service for heritage interpretation, education, historic preservation, land conservation, and cultural heritage tourism. This Susquehanna National Heritage Area designation was made possible, in part, by the scholarship produced by Professor Benowitz's Public Heritage courses and the scholarship produced over four years of Elizabethtown College Summer Creative Arts and Research Program (SCARP) projects conducted by Kyle Cappucci.

This ongoing SCARP project has created a partnership between Elizabethtown College's Honors Program and 13 community partners: The Lancaster Economic Development Company, The Lancaster County Planning Department, The Lancaster County Redevelopment Authority, The National Main Street Center, The Pennsylvania Downtown Center, The National Trust for Historic Preservation, Preservation Pennsylvania, The Trust for Historic Preservation Lancaster County, The Marietta Restoration Associates, Our Marietta, RiverStewards, Susquehanna Riverlands, Marietta Area Business Association, and the Marietta Borough.

These groups have been working together to identify, conserve, and preserve Marietta's heritage resources to retain and enhance strong community character and sense of place. Integrating the conservation and preservation of heritage resources in Marietta's economic development and revitalization. Ensuring new economic development respects and complements the patterns, character, and scale of Marietta's traditional communities and rural landscapes. Promoting strong leadership, collaboration, awareness, and responsibility in conserving Marietta's heritage resources among the public, private, and non-profit sectors celebrating and promoting Marietta's heritage resources. This work contributes to ensuring adequate financial resources and incentives are available to implement Marietta's heritage preservation goals through employing a strategy developed by The National Trust for Historic Preservation (1949) called "This Place Matters!"

This Place Matters is a national campaign created by the National Historic Preservation Trust, encouraging people to celebrate places meaningful to them and their communities. Since 2015, participants have shared over 10,000 photographs of themselves and their favorite places on social media using the hashtag #ThisPlaceMatters. 'This Place Matters' started in 2008 as a way for people to shine a spotlight on the historic places playing a role

in their lives. It is like crowdsourcing people's connections to the built environment," says Jason Clement, director of community outreach at the National Trust. "And the best part -- there are zero rules. These can be places large or small, nationally significant or personally priceless, historic, or maybe old. They have to mean something to you." The project is simple: Visit the Saving Places website to download the tool kit and print a sign. Take photos with the sign at the places mattering the most to you and share the photos with others on social media with the hashtag #ThisPlaceMatters. The virtual preservation project offers people opportunities to add their narratives to the history of places meaningful to them, whether those places are community churches, elementary schools, a barn on an old family farm, or the old corner. The project has a very DIY feel to it and has no long-term political or high-cost agenda. Yet, it encourages people to reignite those connections to places having and continuing to have importance to them. Every person out there has a place meaning something to them, and "This Place Matters" provides a platform -- adapted to our changing world of social media and selfie sticks -- to preserve, remember, and share this love of these places. This campaign is not just public awareness through photography and social media. It is about telling the stories of why these places hold historical significance. Through This Place Matters, the National Historic Preservation Trust encourages and inspires an ongoing dialogue about the importance of place and preservation.

The Borough of Marietta has a Heritage Plan with this objective: "Integrate the conservation and preservation of heritage resources in the economic development and revitalization of the Marietta borough's varied resources. Promote historic and cultural resource conservation and preservation as an economic tool in revitalizing Marietta and its neighborhoods. Develop additional sustainable and asset-based heritage tourism opportunities as a form of economic development."

This Community-Based Learning (CBL) project, a collaboration between the Elizabethtown College Honors Program and Marietta Borough's Our Marietta initiative, utilizes an asset-based planning process through a grassroots local community action task force called "Our Marietta."

This effort endeavors to cultivate viable working relationships among local government and business leaders, residents, community-based organizations, and regional agencies to enact a plan benefiting the community and economic development future of Marietta Borough in collaboration with the Marietta Historic District, the Chiques Historic District, the Northwest Lancaster County River Trail, Marietta Restoration Associates, Inc.; RiverStewards, Inc.; Rivertownes PA USA, Inc.; and Susquehanna Heritage, Inc.

This CBL project involves the Susquehanna Riverlands Conservation Landscape initiative's objectives to revitalize the Rivertown communities of Marietta, Columbia, and Wrightsville. The Northwest Lancaster County River Trail has positioned Marietta to provide recreational opportunities, important conservation benefits, tourism, and historic preservation projects, helping spur revitalization in Marietta Borough. This project will involve collaboration with the Lancaster County Planning Commission, the Lancaster County GIS Department, and the Economic Development Company of Lancaster County.

This project employs the active learning pedagogy from the National Collegiate Honors Council's City as Text™. The National Collegiate Honors Council's Signature Program, "The City As Text," is where students immerse themselves in the local community exploring the culture and geography of the local neighborhood. Students are challenged to be sensitive and reflect on the human experience in the local built environment. Through City As Text Honors, students explore the architectural landscape of the neighborhood and conduct research in repositories of public record, i.e., libraries or archives. Books read, images acquired, sounds heard, tastes and smells ingested. Observations all become materials contributing to the students' experience about how much is normally missed in an ordinary day of one's life and how much might be seen and heard. City As Text is an active learning approach helping students regard the world as a book to be read and to see their journey through it as a cartographer's task of charting the personal paths they take to uncover and discover the local environment around them.

This project draws heavily on research methods taught in the course HON 201 - HNR Elizabethtown History: Campus and Community (PHS 201) and the ArcGIS maps created by students in this class illustrating the history and economic development of Marietta, Pennsylvania. The major objective of this project is to

contribute to Our Marietta's asset-based planning process to identify and mobilize existing and unrecognized resources such as physical, human, social, financial, environmental, political, cultural, and historical assets.

Kyle Cappucci gave a presentation entitled: "Putting Historic Marietta on The Map: This Place Matters!" presented: Scholarship and Creative Arts Day (SCAD) at Elizabethtown College on Tuesday, 16 April 2019. Members of the Marietta Borough Council attended the presentation and invited Cappucci to give his presentation at the Marietta Borough Council meeting on Tuesday, 9 July 2019. The Mayor of Marietta extended this same invitation to Cappucci when he heard Cappucci's presentation at Marietta Day on Saturday, 11 May 2019. Cappucci also presented at the Landmark Conference Landmark Research Symposium for SCARP at Elizabethtown College on Thursday, 11 July 2019. Cappucci accepted an invitation to speak at a Marietta town hall forum hosted by "Our Marietta" regarding historic preservation and economic development on Wednesday, 17 July 2019.

In 2021 Cappucci's SCARP project was entitled "Ecological and Economic Revitalization Through Historic Preservation of the Northwest Lancaster County River Trail in the National Historic District of Marietta, Pennsylvania." The Maryland-based Chesapeake Bay Trust awarded Marietta Borough a \$237,515 grant. The funding was used to improve a section of the Northwest Lancaster County River Trail running through Marietta. Previously a gravel section of the trail was replaced with porous pavement and lined with water-capturing rain gardens. The project also made the trail complainant with the Americans with Disabilities Act. Marietta Borough secured the grant, in part, through Honors students' scholarship published online with ArcGIS maps (SCARP 2019 and 2020).

A local township engineer and historian commented on how the Elizabethtown College Honors Program's Community Based Learning/Civic Engagement ArcGIS maps have been a "very compelling way of engaging a broader audience with the beauty of built history and importance of preservation. The current proprietor of the Rail Road House and McCleary's Pub, Freddy States, is a local entrepreneur serving on the Marietta Borough Council who has a vision for economic development in Marietta in conjunction with the Lancaster County River Trail. Freddy States has made Marietta a destination for tourists. Marietta is located in Lancaster County, drawing millions of visitors who contributed \$2.91 billion in tourism in 2018. For seven decades, the local tourism industry has been a major contributor to the economy of Lancaster County. The number of tourism industry direct jobs makes tourism Lancaster County's sixth largest private sector, non-farm category in the local economy. In 2018, some 8.85 million visitors came to Lancaster County, up 2.5% from the previous year.

Marietta Borough, a National Historic District, received a "Placemaking" grant from the Lancaster County Conservancy's Susquehanna Riverlands program and a grant from the National Fish and Wildlife Federation. Marietta Borough leadership has created a Heritage Plan to promote and protect its historical, recreational, environmental, arts, and cultural resources, making it a destination location and spurring economic development. The specific goals for this project are dictated by the goals of Marietta's Placemaking Heritage Plan: Identify, conserve, and preserve Marietta's heritage resources as a basis for retaining and enhancing strong community character and a sense of place; Integrate the conservation and preservation of heritage resources in the economic development and revitalization of Marietta's various resources; Promote historic and cultural resource conservation and preservation as an economic tool in the revitalization of Marietta and its neighborhood; Develop additional heritage tourism opportunities as a form of economic development both sustainable and asset-based; Strengthen the involvement of the Marietta Borough Council in heritage conservation, and ensure it is an integral part of the municipal plan; Encourage local residents to volunteer in interpretative programs at publicly and privately operated historic and cultural venues; Build the public's awareness of heritage resources and the value of conserving and preserving these resources.

At the end of the Spring Semester 2022, Kyle Cappucci defended his Honors in the Discipline (HID) program in the School of Business Project: "Community Economic Development In the National Historic District of Marietta, Pennsylvania." Cappucci had two surveys posted in the Marietta community. One survey was for persons patronizing local business and the second survey was for persons engaging in recreation on the Northwest Lancaster County River Trail. Both surveys illustrate why persons visit and live in Marietta. Both surveys revealed what persons who live and visit Marietta believe can contribute to the economic development of the local community. I have shared these findings with the leadership of Marietta Borough contributing to their asset-based

planning process identifying and mobilizing existing as well as unrecognized resources such as physical, human, social, financial, environmental, political, cultural, and historical assets.

In the summer of 2022, student Eric Schubert engaged in a Summer Creative Arts and Research Program (SCARP) project entitled: “Launching A National Historic Preservation Trust ‘This Place Matters’ Campaign Supporting Marietta, Pennsylvania’s ‘Placemaking Heritage Plan,’ Through The National Honors Colligate Council’s ‘Place As Text.’” Using the toolkit provided by the National Historic Preservation Trust, Schubert collaborated with the leadership on the Marietta Borough and Pennsylvania Department of Transportation’s historian and archeologist in designing a plan for launching a social media campaign for Marietta. Schubert’s context for this campaign was recognizing the resilience of the people of Marietta in the fifty years since Hurricane Agnes. Schubert secured funding from local businesses to underwrite the cost of printing and mailing a poster, foldable, with instructions on how to post This Place Matters selfies on social media. These posters were mailed out to residents in the Marietta National Historic District prior to the first public event introducing the This Place Matters Campaign. The This Place Matters campaign for Marietta was rolled out at the Marietta Community House, as part of their “Town Talks” programming where Schubert presented: “This Place Matters: Historic Preservation & Economic Development in Marietta.” Schubert’s presentation provided the local community with the necessary context for launching the This Place Matters Campaign for Marietta while simultaneously contributing to a wider community series of events recognizing the resilience of the Marietta community in the 50 years since Hurricane Agnes. Schubert presented at the 13th Annual Landmark Conference Undergraduate Research Symposium at Moravian University, his poster presentation was entitled: “Launching A National Historic Preservation Trust ‘This Place Matters’ Campaign Supporting Marietta, Pennsylvania’s ‘Placemaking Heritage Plan,’ Through The National Honors Collegiate Council’s ‘Place As Text.’”

Cappucci and Schubert joined Professor Benowitz in presenting at the 56th Annual Conference of the National Collegiate Honors Council in Orlando, Florida 27-31 2022; about their experiential learning, civic engagement, and their SCARP projects related to earning the Certificate in Public Heritage Studies. The theme of the conference was "Reimagine Honors: Past, Present, Future.," Cappucci and Schubert’s presentation was entitled “Honors Community-Based Learning Uninterrupted: Pandemic Possibilities.” At the conference, NCHC released a monograph entitled Place, Text, Community: City As Text in the Twentieth Century. Professor Benowitz authored the chapter entitled "Transforming Community Based Learning Through City As Text" in Part 3: "Designing City As Text Integrative Learning Experiences." In his chapter Professor Benowitz discusses how he has integrated the NCHC pedagogy City As Text into the fieldwork required in courses for the Public Heritage Studies Certificate.

This year marked the Marietta Restoration Associates’ 56th Annual “Marietta Candlelight Tour of Homes.” The Marietta Restoration Associates invited Elizabethtown College students earning the Certificate in Public Heritage Studies (most of whom are in the Honors Program) to present their scholarship about historic preservation in Marietta at this event on Sunday, 4 December 2022. More than 1,000 visitors toured the Union Meeting House (1818), where students gave poster presentations and shared their ArcGIS maps illustrating historic preservation efforts in Marietta.

This report is one of sixteen reports about historically significant homes in the National Historic District of Marietta, Pennsylvania, in Lancaster County. These reports tell the story of the resilience of the people of Marietta, who rebuilt their community in the aftermath of Agnes, weathered future storms, and became national leaders in the historic preservation movement, contributing to local economic development and addressing environmental and ecological challenges through exemplary stewardship of the earth and the built environment.

Jean-Paul Benowitz

Elizabethtown College Director of Public Heritage Studies

3 February 2023

Property Details:

48 East Front Street in Marietta, PA, was built in 1840. The home is a residential property type. The house was built in a colonial style. 48 East Front Street has 2,823 square feet of living area. In total, the area measurement of the land is 6,098 square feet. The gas, sewage, & water supply use the public system & electricity is hooked up. The property has 2 ½ finished stories with a basement (1,084 SqFt.), 2 Full Baths, 1 Half Bath, # Bedrooms, # added fixtures, & a 36 sq Ft. Open Slab Porch. The exterior walls are masonry, Stucco on Block (2,823 Sq. Ft.). The property has a composition shingle roofing style.¹

Deed Search:

Jacob Stahl (1796-1884), one of the wealthy Marietta lumber dealers of the nineteenth century, bought this property in February of 1844.² Still, the following year, Jacob had replaced a wooden frame shop with a brick house, and in 1853 willed the property to his son, George Washington Stahl (1823-1866), and daughter-in-law, Sarah E. Longenecker (1828-1909)³. Jacob resided next door and retained ownership of his house while his son occupied it. Unfortunately, George Washington Stahl's untimely death at only forty-two prompted Jacob Stahl to change the will to G.W.'s son, Edmond L. Stahl (1848-1900), which was processed upon Jacob Stahl's passing in 1884⁴. After Edmond's death, the house was sold out of the family to S.F. Frey in 1902.⁵ Frey and his wife, Anna Frey, sold the property to Isaac B. Hoffman in 1907.⁶ Hoffman then sold the property to Ernest Hewitt in 1916.⁷ Mr. Hewitt sold the residence to George Eppley and his wife, Fannie Eppley, in 1924.⁸ The Eppleys decided to sell this property a few years later, in 1928, to Anna Eurich.⁹ Two years later, Ms. Eurich was reported deceased and left the property and other assets to her son Chester Eurich. Chester would be the sole owner of the property up until his death. Anna Eurich's Will stated that after the passing of Chester Eurich, the Columbia Trust Company would sell the property at public or private sale for the best price. Upon Chester Eurich's death in 1952, the Columbia Trust Company sold the house to Margaret C. Ford at an auction.¹⁰ In 1964, Ford sold the house to James Rice Jr. and Janet Rice.¹¹ The married couple remained at the property for a near decade before until the sold the property rights to record owners William and Louise Brown in 1972.¹² In 1986 the house was sold to Roger Ritzman.¹³ In 1987, Roger Ritzman sold the house to James Sagris.¹⁴ In 1993, Sagris sold the property to

Kurt W. Steinman.¹⁵ Steinman was the property owner for almost three decades until he sold the home to its current owner Ian Via-Minnich in 2021.¹⁶

Architectural Style:

As one approaches the home, one will find a structure like its original construction. The 6,098 sqft lot was the location of a local frame shop until its selling to Jacob Stahl. The once wooden frame shop was torn down in 1844, and a three-bay facade took its place in 1845. The new brick federal-style structure consisted of 2,823 sqft of living space. All this square footage resided in the floors above ground as the basement remains unfinished to the present day. The six-panel front door resides on the left side of the facade, which is not usual for the federal-style build that prefers symmetry. The door possesses a fanlight, and upon entry, one is quick to notice the traditional layout of the home. The home has an eat-in kitchen, formal dining room, wood flooring, and an open dog-legged open newel staircase with a simple balustrade. The house's interior has built-in bookcases and a federal-period mantel fireplace. Upon further inspection of the house's exterior architecture, a fenced courtyard in the rear can be viewed from the six-over-six windows with flat lintels overhead. It's asphalt roofing and cut-stone masonry protect the home. The most apparent feature of the home is the large dormer window projecting out of the gabled roof. Information concerning how and when these features were introduced to the house could not be collected from extensive research. The only alterations known to the house were provided via Sanborn Maps, which suggested a rear addition to the house in 1886 and a timber addition to the east side of the house in 1899. This east-side addition was removed a few years later, in 1904. The house was sold out by the Stahl Family in 1902, which could shed light on the quick reduction of the timber addition.

Federal Style 1780 -1820

The Federal style is also known as the Adam style; after the Adam brothers, British architects developed this style in England. It is a refinement of the Georgian style, which was popular in the years preceding the Federal style. Like the Georgian style, the Federal style is designed around a center hall floor plan or side hall for narrow row houses. The Federal style has many of the same elements of the Georgian style - symmetry, classical details, and a side-gabled roof - yet it is different in its ornamentation and sophistication. Federal details are more delicate, slender, and finely drawn than their Georgian counterparts and may feature swags, garlands, and urns. Also, more formal elements were introduced in the Federal style, such as the front door fanlight window, sometimes with flanking sidelights and more elaborate door surround and porticos. The Federal style is also known for dramatic windows, three-part or Palladian windows with curved arches. Another outstanding - yet less common - Federal feature is curving or polygonal window projections.

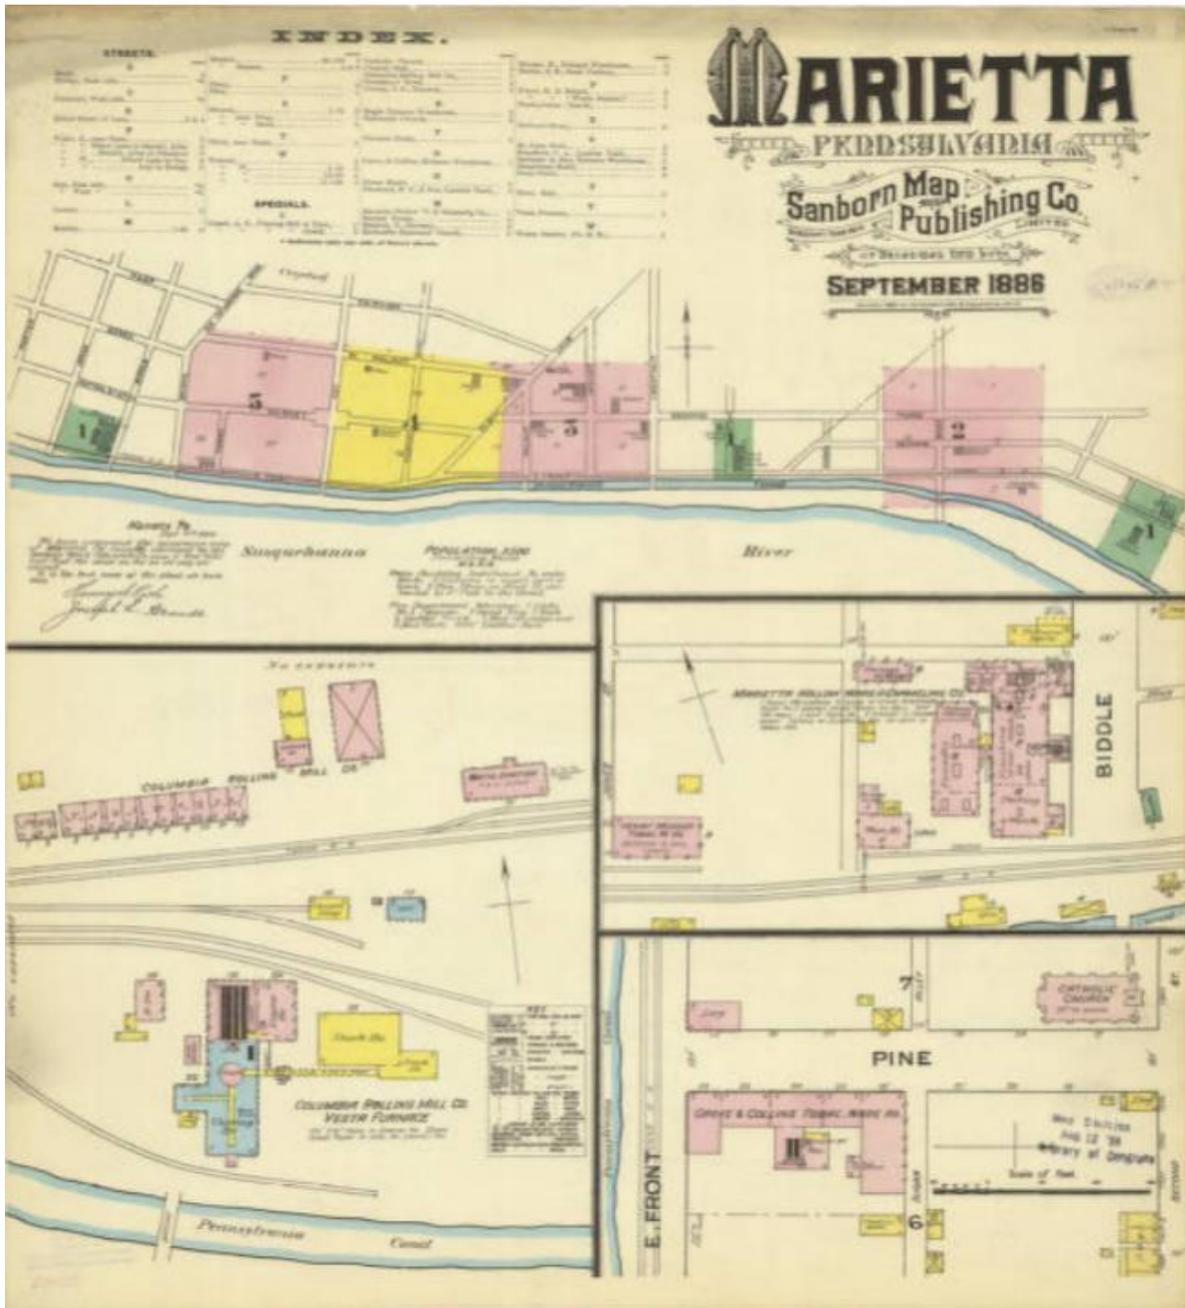

The Federal style became popular throughout the colonies after the American Revolution and was dominant until about 1820 when it was supplanted by the Greek or Classical Revival Style. The easiest way to identify a federal-style building from a Georgian one is to look for the elliptical fanlight over the front door or the Palladian windows - not that those design features do not appear in later styles as well. The Federal house in Pennsylvania is usually a brick two- or three-story building.¹⁷

Sanborn Maps:

Sanborn Maps are named for civil engineer and surveyor Daniel Alfred Sanborn (1827-1883), founder of the Sanborn Map Company (1866-1996). Sanborn maps are detailed maps of U. S. cities and towns created for insurance companies to assess liability in urbanized areas of the U. S. after the Civil War (1861-1865). The Homestead Act (1862), transcontinental railroad construction (1863-1869), the Second Industrial Revolution (1870-1914), and massive European immigration to the U. S. (1882-1914) all fostered increased population, urbanization, and heightened demand for mapping. Sanborn maps are valuable for documenting changes in the built environment of American cities over many decades. Sanborn maps include outlines of each building and outbuilding; the location of windows, doors, firewalls, and porches; as well as the composition of building materials, including the framing, flooring, and roofing materials; indicating building uses, sometimes even particular room uses; house and block numbers; street names, street and sidewalk widths, property boundaries; natural features such as rivers and canals; railroad corridors and the names of most public buildings, churches,

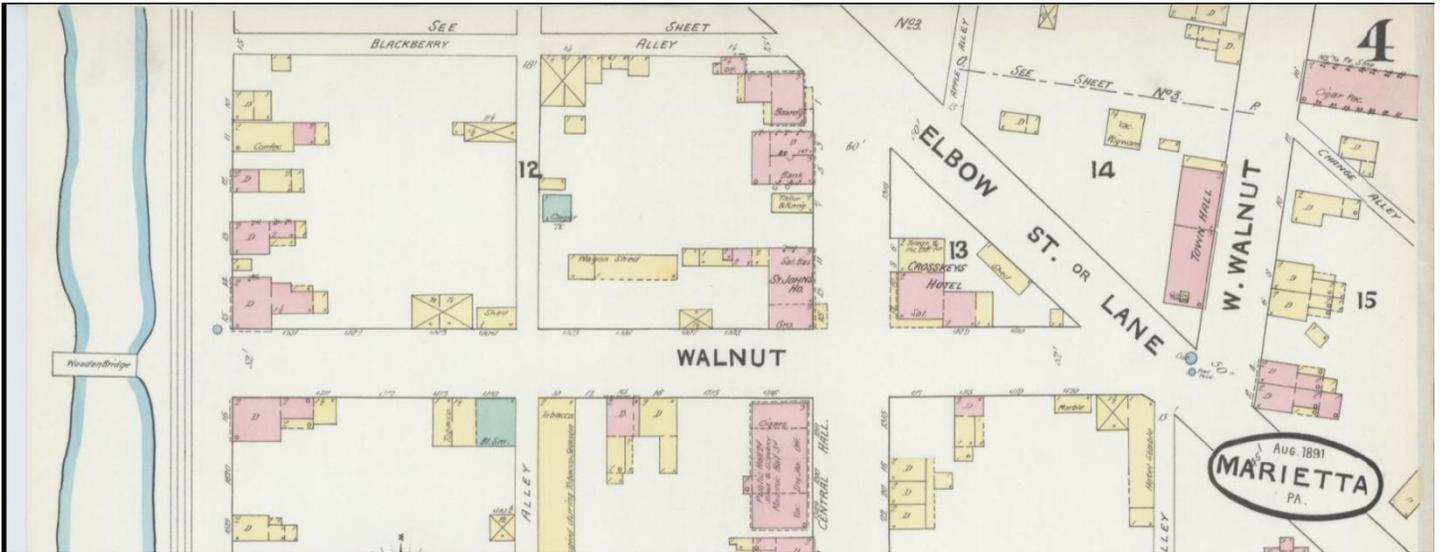

and businesses. Sanborn maps are primarily found in the archives of special collections of historical libraries, town halls, and academic libraries. Sanborn maps facilitate historical research by studying urban growth and decline patterns and researching the evolution of specific buildings, sites, and districts. Historic preservationists use Sanborn maps to understand the significance of historical buildings, the historic use of buildings, and building materials in conservation and rehabilitation efforts as well as locate residences and workplaces of historically significant past residents and local community leaders and to study the patterns of growth and migration of populations. Students in this class use Sanborn maps to trace the evolution of the historically significant property assigned to them and illustrate Marietta's growth.

History of Marietta, Pennsylvania

*Founding Families of Marietta*¹⁸

Marietta was established in the eighteenth century which is in contrast to some histories of the community placing the origins between 1800-1812. Marietta was settled by Scotch-Irish Presbyterians and Swiss German Mennonites which is in contrast to some histories claiming the community was settled exclusively by Scotch-Irish Presbyterians. The Scotch-Irish Presbyterians founders focused on transportation along the Susquehanna River and Pennsylvania Canal, while the Mennonites founders initiated lumber production and related industries. Both entrepreneurial founding groups relied on transient workers.

Initially British fur traders, competing with French fur traders, established economic relations with indigenous populations along the Susquehanna River. Welsh fur trader Robert Wilkins was likely born around 1672 in Brecon, Wales,¹⁹ arrived in the Marietta area sometime before 1702, at which time he married Elizabeth Ross in Lancaster County.²⁰ Wilkins first settled along the Conestoga Creek, next to Richard Carter who settled Warwick Township. In 1718, Wilkins took up 200 acres of land along the Susquehanna River, and in 1727 he sold it to The Reverend James Anderson, primary founder of Marietta.²¹

The Reverend James Anderson (1678-1740), educated at Edinburgh, Scotland under the care of Principal Stirling,²² served The Donegal Presbyterian Church. Born in Scotland ordained by Irvine Presbytery, 17 November 1708 in Virginia. Anderson arrived in the Rappahannock, Virginia on 22 April 1709, before settling in New Castle, Delaware in 1717, later accepting a call to a congregation in New York City, which, at the time was worshiping in the City Hall. On 24 September 1726, he received a final call to the Donegal Presbyterian Church in Mount Joy. He was installed the last Wednesday in August 1727.²³

Wilkins' neighbor, George Stewart (1683-1759), from Donegal, Ireland,²⁴ was elected as one of the first Commissioners of Lancaster County at its formation in 1729 and elected to the Provincial Assembly in 1732 dying soon after his appointment.²⁵ After George Stewart passed, his son John Stewart (1705-1749) inherited the land and sold it to David Cook, sometimes spelled Cooke. John Stewart was married to Ann Anderson (1716-1816), the daughter of The Reverend James Anderson.²⁶

David Cook (1721-1786), sometimes Cooke, was born in Lancaster County and is buried in The Donegal Presbyterian Church Cemetery, Mount Joy.²⁷ Eventually, David Cook sold this land (purchased from John Stewart), to Jacob Heistandt Neff,²⁸ the middle and last name represent two prominent Mennonite families and surnames in Lancaster County and specifically the Marietta area. Jacob Heistandt Neff (1727-1798) was from Manor Township.²⁹

Marietta was founded by leaders and members of two prominent churches in Mount Joy. The Donegal Presbyterian Church (1732) and the Mount Joy Mennonite Church (1790). The Donegal Presbyterian Church was founded in 1727 with the church being built in 1732. The Reverend James Anderson (1678-1740), primary founder of Marietta, was the minister.³⁰ The Mount Joy Mennonite Church was founded in 1790, with members

meeting for worship in their homes, as was the custom of the time and remains the practice of the Old Order Amish. In 1812 a log meetinghouse on land donated by Peter Delebaugh Kraybill (1784-1869).³¹ The first minister of The Mount Joy Mennonite Church was The Reverend Jacob Hostetter Hershey (1747-1819).³² Both The Reverend Jacob Hershey and Peter Kraybill are buried at the Kraybill Mennonite Cemetery in Mount Joy.³³

This points to the significance of the Presbyterians and Mennonites settling in Lancaster County after arriving in Philadelphia and Delaware, eventually realizing the economic significance of developing the land along the Susquehanna River associated with westward expansion of the nation. The early settlers settled in Mount Joy and not within the dangerous flood plain of the Susquehanna River. It also demonstrates the socio-economic bias of the settlers, believing poor lives were dispensable, poor transient workers living and working along the Susquehanna River, if they lost their lives and/or livelihood from flooding or from rowdy living, there are many histories of the community documenting drunken brawling in taverns, pubs, and hotels, the lives of these transient workers were not important, while the wealthy, benefiting from commerce along the Susquehanna River and Pennsylvania Canal, lived on higher safer ground in Mount Joy.

The Pennsylvania Canal & Marietta, Pennsylvania

The next time you are on the Northwest Lancaster County River Trail (2007) in Marietta, imagine the path of the Pennsylvania Canal (1824-1900) running parallel to the Susquehanna River. Take a moment to consider Nebuchadnezzar, the great ruler of Babylon in 500 B. C., remaking a canal which is believed to have first been dug more than a thousand years earlier. The Nebuchadnezzar Royal Canal connected the Tigris and Euphrates Rivers.³⁴ Imagine China's Grand Canal, a UNESCO World Heritage Site, 1,000 miles long connecting Hangzhou and Tientsin, built in 500 B. C. Reflecting on how there are more than 26,000 miles of canal in all parts of the world, suddenly Marietta feels much older and more connected to the world than it seems today.³⁵

When you walk around Marietta and you come across the Duffy-Rottmund House (1863) on Market Street, formerly Irishtown, think about Colonel James Duffy (1818-1888) as a boy, growing up along the Susquehanna River, working on the log rafts as a draftsman until earning the rank of pilot and making a successful career in river transportation.³⁶ In 1846 he traveled through Europe making a study of canals and returning to Marietta he fulfilled his goal of making the Pennsylvania Canal through Marietta a major corridor for transporting coal. By 1848 Colonel Duffy established a line of boats for transporting coal from Pottsville to New York, in the interests of the Schuylkill Navigation Company.³⁷

When you think about Marietta and the Pennsylvania Canal remember it was based on a model established in 1639 when Mother Brook, the first canal was built connecting the Charles and Neponset Rivers in Dedham, Massachusetts.³⁸ From the beginning, Americans accepted waterways as the best method of traveling, or for moving goods from one place to another.³⁹ Construction on the Pennsylvania Canal started in 1824, it was a system of canals, dams, locks, tow paths, aqueducts, viaducts, tunnels, and bridges facilitating shipment of heavy bulk goods between Philadelphia (1682) and Pittsburgh (1758). The Pennsylvania Canal System developed in response to the growing markets in the Northwest Territory reached by the Ohio River through connecting the Susquehanna, Juniata, Conemaugh, Kiskiminetas, and Allegheny Rivers.⁴⁰ When finished in 1834 the trip from Philadelphia to Pittsburgh, via the Main Line of Public Works (1826), could be made in three to five days. 1830, more than 4,000 miles of canals in New York, Pennsylvania, Maryland, Virginia, Ohio, and Indiana were started or planned between 1825 and 1845.⁴¹

The wonder of it all was the fact there were no American engineers at the time, and neither was there any excavating machinery. With no more than the ingenuity of local surveyors and such simple tools as shovels and wheelbarrows, these artificial rivers were cut through the most difficult countryside.⁴² The equally amazing thing is how the canals are still functioning. Today we find modern railroads using ancient canal beds for their own track beds. Sometimes we drive through a high-walled section of farmland which was first a canal way before it became a highway. We might have thought a ditch running parallel to a railroad was for drainage. Actually it was once a canal; the present railway tracks are built on what was once the tow path. Or we might come upon some lofty bridge piers across a river where there is no roadway: we would hardly suspect they once held a wooden aqueduct and canal way, carrying it and the canal traffic high across the roaring river below.⁴³

The Pennsylvania Canal was not the only waterway serving the local economy of Marietta. In 1797 the Conewago Canal began carrying riverboats around the Conewago Falls on the Susquehanna River near York Haven.⁴⁴ The Susquehanna and Tidewater Canal, built between 1836-1840, connected Wrightsville (1811) with Havre de Grace, Maryland (1785). The Susquehanna and Tidewater Canal facilitated transportation of lumber, coal, and raw materials from Marietta (1719) and Columbia (1724) to the Port of Baltimore (1729).⁴⁵ This is the reason why the economy in Marietta was built on lumber, coal, whiskey, and transportation.⁴⁶

The origins of the Pennsylvania Canal date back to 1690 when William Penn proposed building a canal connecting Philadelphia with the Susquehanna River. It took 102 years until 1792, as an initiative of the Washington administration (1789-1797), the Union Canal, was completed in 1828. Running eighty-two miles, the Union Canal connected Middletown (1755) on the Susquehanna River to Reading (1748) on the Schuylkill River.⁴⁷ By 1834 the Main Line of Public Works, composed of interlocking canals, was transporting passengers and freight across 1,243 miles. Incrementally the canals system was integrated into and eventually replaced by the rail roads. In 1859, one hundred and sixty-nine years after William Penn's canal proposal, all canals owned by the Commonwealth of Pennsylvania were sold. The Pennsylvania Rail Road (1846) formed the Pennsylvania Canal Company and continued to use canals for freight transportation. The canal business, however, declined steadily in the last quarter of the nineteenth century, and most Pennsylvania canals no longer functioned after 1900.⁴⁸

The last canal boat to enter Marietta was in August of 1900. Captain Morris Nagle piloted a canal boat carrying coal from Nanticoke (1800) in Luzerne County. Captain Nagle docked the boat at Gay Street. The boat was dismantled and buried beneath the railroad bed when the Pennsylvania Rail Road was installed over the canal tow path.⁴⁹ In Marietta, along the Pennsylvania Canal boats were drawn by mules guided along the tow path parallel to Front Street.⁵⁰ A double canal boat could handle up to 250 tons of freight with a single mule team on the tow path.⁵¹ In the winter the canal was drained to minimize damage from ice blocks and in the spring flooding (good for river transportation) washed out sections of the canal.⁵² The last log raft to float down the Susquehanna

River to Marietta landed on 12 April 1911.⁵³ Thus in the transition from the nineteenth to the twentieth centuries, transportation along the Susquehanna River and the Pennsylvania Canal were entirely replaced by the rail road network, changing the physical landscape of Marietta and the culture as well.

*History of Marietta, Pennsylvania*⁵⁴

As early as 8,000 BC Paleo-Indian settlements, the Susquehannocks flourished along the Susquehanna River with agricultural production and operating complex trade routes expanding throughout the continent. Every river valley and every tributary of the Swatara, Conoy, Chickies, Conestoga, Pequea, and Octorara Creeks has considerable evidence of human habitation in Lancaster County, Pennsylvania prior to European contact.⁵⁵

In 1616 Etienne Brule (1592-1633) a French expert in the Algonquin language, who lived among the Susquehanna tribe in western New York, traveled down the Susquehanna River into the Chesapeake Bay. Along the way, Brule explored the tributaries of the Susquehanna River in Lancaster County and encountered the Susquehannock tribes living along the Susquehanna River.⁵⁶

In 1629 Etienne Brule partnered with the British fur trader Sir David Kirke (1597-1654) establishing trade relations between the Europeans and Susquehannock tribes. By 1680-1690 no Susquehannock villages existed in Lancaster or York Counties. There was a migration to New York to settle among the Iroquois and Seneca and a movement south to Maryland.⁵⁷

In 1681 British King Charles, II (1630-1685) granted a land charter to Quaker leader William Penn (1644-1718) to repay a debt the King owed to Admiral William Penn (1621-1670). King Charles named it Pennsylvania, meaning Penn's Woods: Penn and Sylvania from the Latin *silva* which translates forest or woods. There were no Susquehannocks living in this region by the time William Penn acquired the land from King Charles, II (1630-1685).⁵⁸

In 1701 William Penn (1644-1718) gave a patent of 3,000 acres of land along the Susquehanna River to George Beale (British). By 1703 Consumed by debt, William Penn (1644-1718) charged his land agent James Logan (1674-1751) to send him in London "bear and buck skins for they [the creditors] bear an advance" and "urge the Pennsylvania assembly to establish a propriety monopoly in the Indian trade."⁵⁹

In 1708 James Logan invited the French Expert Indian language interpreter Peter Bezaillion (1661-1742) to establish a fur trading post where the Conoy Creek meets the Susquehanna River in Bainbridge, Pennsylvania north 7.5 miles north of Marietta. By 1719 Bezaillion invited the Piscataway tribe to move from Maryland to Conoy Town. They assumed the name Canoise or corn shellers and were called the Conoy Indians.⁶⁰

In 1717 Peter Logan did not only invite French and Indian fur traders to settle between the Conoy and Conewago Creeks along the Susquehanna River, he also sold land to the highest bidders among the Swiss-German (mostly Mennonite) Palatine farmers arriving in Pennsylvania in 1717. Simultaneously there was an influx of Ulster Scots or Scots-Irish settlers. William Penn's sons John (1700-1746), Richard (1706-1771), and Thomas (1702-1775) inherited a great deal of debt when their father died in 1718. The Penn brothers became alienated from Quaker beliefs and did not subscribe to their father's ideals for Pennsylvania.⁶¹

In 1717 one year before his death, William Penn reserved 16,000 acres in Lancaster County for various tribes as a reserved hunting ground. This promise by William Penn would not be kept by his sons. According to

Mennonite historian the Reverend John L. Ruth, Mennonite settlers in Lancaster County anxiously paid up to four times more than the price the Penn brothers were asking for acres. Meanwhile the Scots-Irish settlers encouraged to move here by James Logan started living on the land without title. The obvious defense of one's claim to property was to construct buildings and begin to improve the land, even before it was legally acquired.⁶²

In 1719 Robert Wilkins, Scotch-Irish (Ulster Scots; Anglo-Irish Presbyterians), Indian Trader, acquired 300 acres along the Susquehanna River north of Chickies Creek. In 1719 George Stewart, Scotch-Irish, was sold a tract of land east of the Robert Wilkins tract. In 1727 Robert Wilkins sold the tract of Penn land to Scotch-Irish, The Reverend James Anderson, clergy at the Donegal Presbyterian Church (1732) in Mount Joy, in East Donegal Township. Son James Anderson operated the ferry and built the Accomack Inn.⁶³

In 1733 George Stewart's son and daughter-in-law, John and Ann Stewart, inherited and sold the James Anderson tract to David Cook. This tract of land was given to his son David Cook whose son, David Cook, laid out the town of New Haven. Additional acres of the Stewart tract were given to David Cook's son James.⁶⁴

Peter Bezaillion built Old Peter's Road, as it is still known in parts of Lancaster County, to facilitate French and Indian fur trading linking Philadelphia to Bainbridge (1719). Bezaillion who, in partnership with the British, challenged France's control over the territory between the Appalachian Mountains and the Mississippi River, a struggle which helped precipitate the French and Indian War. The French found the Algonquin tribes their allies, while the Iroquois sided with the British. Raids of British colonists occurred on both sides.⁶⁵

By 1743, The Piscataway tribes had moved away from Bainbridge, migrating north along the Susquehanna River settling in Shamokin. British victories in Quebec (1759) and Montreal (1760) led to France surrendering all of New France to the British. The British took over all French forts on the frontier and became the new authoritarian power for the tribes in these regions during The French and Indian War (1755-1763).⁶⁶

Between 1775-1783 Marietta played an important role in the American Revolution manufacturing iron and lumber, producing agricultural goods, distilling whiskey, and ferry transportation between Lancaster and York Counties over the Susquehanna River. The capital of Continental Congress was in Lancaster City on 22 September 1777. Lancaster City was the capital of Pennsylvania from 1799-1812. York City was the capital of the Continental Congress from 1777-1778. The Articles of Confederation were drafted and adopted in York thus the establishing the first constituting and government for the United States of America. In 1789 Quaker leader Samuel Wright renamed Wright's Ferry as Columbia and petitioned the new U. S. Congress to make this the location of the U. S. Capitol.⁶⁷

In 1804, the third generation of Anderson, grandson James Anderson, laid out the town of Waterford. By 1812, James Anderson and James Cook procured a charter from the Pennsylvania legislature and named their incorporated towns Marietta. The next year, 1813, Anderson's town Waterford and Cook's town New Haven were consolidated including a tract of land owned by John Myers east of Moravian Town and a tract of land owned by Benjamin Long north of Waterford.⁶⁸

In the same year, 1813 John Pedan, James Mehaffey, and Colonel James Duffy purchased 161 acres west of the Anderson tract and laid out Irishtown. The founders named each north-south street after U. S. naval heroes: Biddle, Jones, Decatur, Bainbridge, Morris, Hull, and Porter. The east-west streets named for American sea vessels: Essex, United States, Wasp, and Constitution. United States Street would become Market Street when all the towns were incorporated into the borough of Marietta.⁶⁹

⁶⁹ Ibid.

The next year, 1814, the Cassels sell the Neff tract to Jacob Grosh who laid out Moravian Town, known locally as Bungletown. By this time the major industry in Marietta was lumber. By 1814 there were nine lumber merchants in Marietta. Planing mills, lumberyards, carpentry shops, and allied businesses were the backbone of the local economy. Marietta was a waypoint for shipping lumber, bundled into rafts, downriver. In 1807 Henry Cassel established a lumber business on the corner of Third and Bank Streets. In 1848 Henry Cassel was joined by his son A. N. Cassel who in 1872 built a planing mill associated with the business. In 1850 B. F. Hiestand & Sons Planing Mill was established on the Susquehanna River below Chickes Rock with the lumber offices located on the corner of Bank and Second Streets. In 1945 the Hiestand lumber properties were deeded to the Paul W. Zimmerman Foundries Company manufacturing brass, bronze, and aluminum castings. In 1954 Zimmerman Foundries Company, was acquired by the Donegal Manufacturing Corporation, later called Donegal Steel Foundry Company which manufactured carbon, low alloy and stainless steel castings primarily for tanks for the U. S. Army during the Korean War (1950-1953).⁷⁰

During 1812-1814, The Columbia-Wrightsville covered bridge constructed over the Susquehanna River, at the time considered the longest covered bridge in the world. Greatly enhances the economy for Marietta. Between 1812-1815 the War of 1812 between the U. S. and Great Britain began over alleged British violations of American shipping rights, such as impressment, the forcing of American merchant sailors to serve on British ships. American forces unsuccessfully invaded Canada and the British retaliated by burning down Washington, D. C. Within weeks U. S. Forces repulsed sea and land invasions of the British at the Port of Baltimore, particularly Fort McHenry. The war ended with victory for the United States at the Battle of New Orleans. Two companies from Marietta marched to Maryland in defense of Baltimore. One of the companies was called the Marietta Grays commanded by Jacob Grosh.⁷¹

In 1817 James Anderson built a road over Chickies Mountain, the Old Columbia Pike, linking Columbia, Pennsylvania, formerly Wright's Ferry, (1726) 3.6 miles south of Marietta. Anderson was preparing for the state legislature to build a bridge across the Susquehanna River connecting Marietta to York, Pennsylvania (1741). James Anderson operated a ferry across the Susquehanna River. Two miles north Mennonite Christian Winiker operated a ferry known as Vinegar Ferry.⁷²

The Economic Panic of 1819 was the first major peacetime financial crisis in the U. S. following the collapse of the economy in the transition from a colonial commercial status with Europe toward an independent economy. The downturn was driven by global market adjustments in the aftermath of the Napoleonic Wars, its severity was compounded by excessive speculation in public lands. The Pennsylvania legislature did not build a bridge between Marietta and York. James Anderson lost most of his money building the Columbia Pike.⁷³

Between 1826-1840 construction of the Pennsylvania Canal system to connect Philadelphia (1682) to Pittsburgh (1669) commenced. The Pennsylvania Rail Road (1846) eventually purchased the Pennsylvania Canal from the Commonwealth of Pennsylvania.⁷⁴

In 1855 Eagle Furnace, anthracite iron furnace, opened. The iron industry in Marietta was dominated by Henry Musselman, Henry Miller Watts of Carlisle, and his father-in-law Dr. Peter Shoenberger, of Pittsburgh. The local iron industry was managed by Watts' son Ethelbert Watts (1846–1919) a U. S. diplomat who played important roles in the Spanish American War, Russo Japanese War, & WW I. These iron plants produced pig iron, sold under the brand name Vesta, transported on the Pennsylvania Canal and later by the railroad. In 1917 the iron plants, known as the Susquehanna Iron Company, sold the furnaces to E. J. Lavino who produced ferromanganese, used for high grade steel, during WW I. The manganese ores came from all over the world & the ferromanganese

product was shipped to Youngstown, Ohio, Coatesville, and Pittsburgh. The production of iron ceased in the 1920s and the furnace was dismantled between 1928 and 1934.⁷⁵

Between 1861-1865, during the American Civil War Marietta played a role in the Battle of Gettysburg 1-3 July 1863. Women from Marietta organized to prepare linen bandages and baked two wagonloads of bread dispatched to Gettysburg, Pennsylvania (1806) 45 miles west of Marietta. Marietta was protected from an invasion of Confederate troops because on 28 June 1863 Union forces burned the Columbia-Wrightsville covered bridge to prevent an advance of Confederate troops approaching from Wrightsville, York County. The Pennsylvania Rail Road used the bridge piers to support a rail bridge crossing the river from 1868-1896 when it was destroyed by the Cedar Keys Hurricane. In 1810 David Muma built a stone house which David Cassel (1774-1855) turned into a hotel in 1823 called the Perry House Hotel named for War of 1812 Commodore Oliver Hazard Perry (1785-1819). Perry House was a stronghold for Confederate sympathizers of Marietta where Copperheads and Unionists engaged in hostile political debates.⁷⁶

In the post-Civil War years, by 1876 The Marietta Holloware and Enameling Company was established, by Colonel James Duffy among others, producing hollow castings such as toilet bowls, lavatory basins, cast iron cookware, ink pots for stencils, glue pots, teakettles, and cookware including sauce pans, and skillets.⁷⁷

In 1882 Dr. H. M. Alexander used the methods of British physician and scientist, Edward Jenner (1749-1823) to create a vaccine for smallpox which he manufactured and sold commercially nationwide and globally. The work began in a chicken house adjacent to his office at 299 West Market Street. He purchased the H. McMullen Farm in the Irishtown neighborhood of Marietta located at Wasp and Biddle Streets and established the first commercial biological laboratory in the United States known as Dr. H. M. Alexander and Company and also as the Lancaster County Vaccine Farm.⁷⁸

By the time of the First World War, in 1916, the heirs of Dr. Alexander sold their shares of the company to the Gilliland Laboratories, Inc. During the Second World War, in 1943 Gilliland Laboratories was acquired by the American Home Products Corporation. The following year, in 1944, The American Home Products Corporation was incorporated into the Wyeth Laboratories, Inc. In 2005 Wyeth Laboratories was acquired by Britain's largest drugs maker, GlaxoSmithKline.

In 1889 Donegal Mutual Insurance Company, formerly Donegal and Conoy Mutual Fire Insurance Company, established on West Market Street in Marietta. During 1960-1961 Donegal built their national headquarters in Colonial Revival style campus on River Road Pennsylvania Route 441 (PA 441).⁷⁹

In 1893 The Columbia and Donegal Electric Railway (C&D), later purchased by The Pennsylvania Traction Company which was acquired by the Conestoga Traction Company (1899) was chartered to build a trolley car line connecting the four miles between Columbia and Marietta and building the Chickies Rock Park. The wooden cars, painted bright blue with yellow trim, were purchased from J. G. Brill Car Company (1868-1954) Philadelphia and the electric lines were installed by Westinghouse Electric Company (1886) Pittsburgh. Trolley tickets were purchased at the Libhart Drug Store.⁸⁰

During 1917-1918 the United States declared war on Germany on 6 April 1917 more than two and a half years after the start of the First World War. Before entering the war, the U. S. remained neutral although it was an important supplier to Great Britain and the Allied Powers. The U. S. made its major contributions supplying raw material for the war effort. The U. S. military established the Marietta Holding and Reconsignment Point along the Susquehanna River. The primary mission was to receive and store Quartermaster, Ordinance, Medical, Engineer, and Signal Corps supplies until east coast ports were in a position to receive and ship materials overseas.⁸¹

⁸¹ Ibid.

During the Second World War, in 1941 the U. S. military expanded the Marietta Holding and Reconsignment Point to accommodate supplying the Lend Lease Act. In March 1941 Lend Lease was enacted distributing food, oil, warships, warplanes, and weaponry. In December 1941, four days after the Japanese attack on Pearl Harbor and the United States, the U. S. Congress declared war against the Japanese Empire. Nazi Germany declared war against the U. S. in response to what was claimed to be a series of provocations by the United States when it was still officially neutral during the Second World War. The United States declared war on Germany.⁸²

During this time, 1942-1945 there was an expansion of the Marietta Holding and Reconsignment Point which is officially designated as the Marietta Transportation Corps Depot. The depot encompassed over eight million square feet, over 400 acres, and employed more than 800 civilians in addition to military personnel.⁸³

In 1947 Machinecraft, Inc. was established manufacturing automatic food shaping machines for mass production of hamburgers and French fries. The hydraulic valves for the first two air craft carriers built during the Second World War were designed and manufactured by Machinecraft. This technology allowed planes to be kept on an even keel during take-off and landing on the decks of the ships.⁸⁴

In 1952 Texas Eastern Transmission Corporation built a natural gas compressor two miles west of the Marietta Air Force Station. This compressor station moves natural gas destined for markets in Philadelphia and New York.⁸⁵

Between 1953-1955 the Transportation Material Command was established at the Marietta Transportation Corps Depot with the mission of supply control, cataloging, procurement, mobilization planning, and standardization and production engineering. In 1955 Marietta Transportation Corps Depot was transferred from the U. S. Army to the U. S. Air Force which created air station with the primary functions of receipt, storage, shipment, and disposal of Air Force material and equipment.⁸⁶

In 1955 the United States Aluminum Corporation of Pennsylvania USALCO is established. Rectangular twenty-five pound “ingots” smelted from scrap aluminum were produced to make castings for automotive automatic transmissions, pistons, aluminum fry pans, and products for national defense purposes.⁸⁷

In May 1957, New Jersey Shell Casting Corporation was organized and operated until 1961 as a shell molding foundry. The corporation existed under the laws of the State of New Jersey from 1957 to 1979 because Joe Nagy lived in New Jersey at the time of incorporation. In May 1957, the original one room block building on South Decatur Street in Marietta, PA was rented from the U.S. Expansion Bolt Company. On December 9, 1965, New Jersey Shell Casting Corporation purchased the block building from the U.S. Expansion Bolt Company. The original size of the building was 2,700 square feet. Due to the growing needs of the business, the foundry has been expanded over the years and currently houses over 18,000 square feet under roof. In 1962, the business was converted to a non-ferrous brass, bronze and aluminum green sand-molding foundry and remains as such today⁸⁸

In the 1970s, a large part of the Marietta Transportation Corps Depot became the Armstrong World Industries Ceiling Manufacturing Plant. Currently part of the Marietta Transportation Corps Depot is owned by the General Services Administration (GSA). The GSA portion of the site is used for the storage of a variety of ores including manganese, chrome, beryl, zinc, and lead in the form of ingots. Access to both portions of the site is restricted by perimeter fencing which has either locked gates or is guarded. The current property owners are: AWI (302.4 acres); GSA (67.5 acres); AAAA Enterprises, Inc. (39.9 acres); PADOT (23.27 acres); Richard C. Yunginger (36.40 acres); and Frederick W. Bushong et ux (9.6 acres).⁸⁹

This property is a superfund site which means the federal government, through the Environmental Protection Agency, has identified parties responsible for hazardous substances releases to the environment and has either compelled them to clean up the sites or it may undertake the cleanup on its own using the Superfund (a trust fund) and costs recovered from polluters by referring to the U. S. Department of Justice.⁹⁰ Sites managed under this program are referred to as “Superfund” sites established as the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. The EPA identifies sites such as Marietta Transportation Corps Depot because they pose or had once posed a potential risk to human health and/or the environment due to contamination by one or more hazardous wastes. Marietta Transportation Corps Depot is currently registered as an Active superfund site by the EPA. However, it is not on the NPL (National Priorities List), which means the EPA does not consider it one of the nation's most hazardous waste sites.⁹¹

Established in 1970, Lawn Equipment Parts Company (LEPCO) is a family-owned and operated wholesale distributor of quality outdoor power equipment, parts, and accessories. Originally, LEPCO operated as an after-market parts distributor to independent lawn equipment dealers. Today, we handle nine major brands of power equipment and continue to supply aftermarket parts to over 1,300 dealers in the northeast region. Over the years, LEPCO has continued to grow, becoming one of the preferred distributors in the industry. Maintaining their reputation for outstanding customer service to its dealers continues to be their everyday focus. LEPCO’s continued goal is to provide quality products and services to groups of independent dealers who, in turn, can provide a higher level of service and support to the end-users for all the brands represented. They sell exclusively to retail dealers in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania.⁹²

In 1981, Rich Kushner opened Swedish Motors at 7 North Decatur Street, advertising that his employees had a unique knowledge of Swedish cars and foreign parts. His niche was more than enough to preoccupy his technicians, some of whom have been with Rich since their service doors opened. Today, Swedish Motors offers the same reliable auto service while also selling and restoring preowned and vintage vehicles.⁹³

Jagtrux, Inc, a contract/common carrier for tractor trailer transportation was incorporated in 1982 by Jim Germak. In 1998 Jagtrux, Inc. purchased an abandoned locomotive repair shop in Marietta, originally built in 1942, and completely renovated the building. Eventually Jagtrux acquired surrounding property and expanded into a seventy-five-acre facility with a full-service shop, cross dock facilities, and secure trailer storage lots. Germak established a strong relationship with Armstrong World Industries becoming a Core Carrier for Armstrong’s facilities in Marietta.⁹⁴

B. N. Excavating is a second-generation family business, specializing in residential, commercial and agricultural excavating services. Bob Nafziger started the company in 1986, after working as an employee for an excavating company in the area for over 15 years. Bob started the company with a single backhoe, dump truck and track loader and steadily built relationships with area contractors to build the business. Today, B.N. Excavating has grown from a small, one-man operation to a trusted leader in the excavating industry throughout Lancaster County and beyond. Headquartered in Marietta, PA, the company is now home to an experienced team of full-time excavators and a diverse line of professional excavation equipment that can meet the excavating needs of small businesses, home owners and agricultural operations.⁹⁵

R & T Mechanical, Inc. was founded in 1987. R & T Mechanical is a contracting company which provides services including plumbing, heating, air-conditioning, and other similar work. R & T is in the East Donegal Industrial Park along with several other companies and organizations including Hess Auctioneers, LLC, Jaxtrux, Inc, Vanguard Modular Building Systems., LLC, and Hiltz Propane.

Founded by Matt Hiltz, a mechanical engineer who has many years of experience in the propane industry, Hiltz Propane Systems is family-owned and operated and comprised of a dedicated crew of propane installation and repair professionals. Specializing in complete turnkey propane system design and installation services, Matt and his dedicated crew bring extensive experience to the table in the areas of LPG system design, engineering, plant connection, fitting and maintenance services.⁹⁶

Established in 1998, Vanguard Modular Building Systems, LLC acquired Schiavi Leasing Corp., the predominate modular builder and regional supplier of modular classrooms in Maine since 1986, as a wholly owned subsidiary. Vanguard successfully expanded on Schiavi's already extensive modular construction capabilities to include distinctively engineered and designed multi-story permanent modular buildings, while retaining the requirements for temporary modular space of all sizes and configurations. Vanguard's experienced modular sales and construction management teams are in offices throughout the Atlantic and Gulf Coasts, enabling us to effectively serve more than 20 states. They provide construction management services and quality temporary and permanent modular buildings to the education, commercial, construction, healthcare, oil and gas, government, and religious markets.⁹⁷

Hess Auctioneers, LLC began operations in June 2007 when John Hess (Hess Auction Group), Phil and Roger Garber (GFI Transport), and Jim Germak (Jagtrux), recognized a need for public truck, trailer and equipment auction and consignment auction in the Mid-Atlantic region. Since the company is conveniently located close to Harrisburg, Lancaster and York, the current site is convenient, secure and allows consignors to bring their equipment to the site in advance of the auctions, so buyers can preview the inventory.⁹⁸

Lancaster Recumbent opened in December 2014, and today, the shop has over 75 different types of recumbent cycles – and continues to grow. The shop moved to a new location at 103 West Market Street in March 2018 – a larger space (for more cycles) located a block and a half off the Northwest Lancaster County River Trail in Marietta, PA. Lancaster Recumbent offers rides for all of life's cycles, new and used semi-recumbent and recumbent cycles, offers personal customizations and adaptations to meet your specific needs. Lastly, they offer repairs and maintenance for practically anything with wheels – from recumbent to traditional upright cycles, from strollers to wheelchairs and walkers.⁹⁹

In September 2017, after seven, sometimes controversial, years in the making, Pennsylvania's first large-scale commercial soybean-processing facility was opened at 1609 River Road in Conoy Township. Perdue Agribusiness's new \$60 Million soybean-processing plant has been long touted by Perdue as a boon to farmers from Lancaster County and the region, saving them transportation costs. The plant has received strong endorsement from local agriculture and business groups.¹⁰⁰ The state gave Perdue an \$8.75 million grant to build the plant in Pennsylvania. With processed water coming from the adjacent Lancaster County Waste-To-Energy Facility on the same campus, as well as steam, Perdue AgriBusiness said the plant is the most environmentally friendly soybean plant in the country. Perdue said the facility would have the lowest rate of hexane emissions of any soybean-processing plant in the United States. The plant will process soybeans and turn them into soymeal for livestock and dairy farms. The plant has 35 permanent employees. Perdue said its construction generated 150 jobs and the plant will spawn 500 jobs in crop production and transportation. Gov. Tom Wolf said, "This plant is

a game changer for farmers in Pennsylvania, opening new lanes of supply, new markets, and new opportunities in the commonwealth's agricultural economy."¹⁰¹

Texas Eastern Pipeline (TETCo) is a major natural gas pipeline which brings gas from the Gulf of Mexico coast in Texas and Louisiana up through Mississippi, Arkansas, Tennessee, Missouri, Kentucky, Illinois, Indiana, Ohio, and Pennsylvania to deliver gas in the New York City area. It is one of the largest pipeline systems in the United States. It is owned by Enbridge. Enbridge connects people to the energy they need to help fuel their quality of life. In the United States alone, more than two million miles of pipelines deliver petroleum and natural gas products. Every year, Enbridge invests in the latest technology and training to meet the high environmental and safety standards our neighbors expect, and to keep pipelines the safest, most efficient and most reliable way to move energy resources.¹⁰² Marietta has its own Compressor Station off River Road and has a direct connection to this major national phenomenon.

Biographical Significance & Historic Purpose of Property

Jacob Stahl acquired the 48 East Front Street lot with a wooden frame shop built atop it. Upon buying the property, he switched the wooden structure to a brick home for his son G.W. Stahl and his wife, pictured in the photo, Sarah Longenecker.¹⁰³

Stahl has left a considerable legacy in the Marietta borough as he is listed as an acting member in the following things: one of the first pew holders moved from Donegal Church to Marietta Church in 1824, an elected elder of the Church in February 1836, and was a member of the English Presbyterian Church and played a role of board member for the building of its church.¹⁰⁴ The stained-glass windows in the rear of the building are dedicated to Jacob's wife, Anna Stahl.¹⁰⁵ The couple's daughter, Mary Jane, married the historical figure A. N. Cassel in 1847.¹⁰⁶ Cassel was one of the promoters and builders of the Lancaster and Marietta Turnpike Company, where he was an officer. Early on, Cassel was affiliated with the Anti-Masonic Party, the Whigs, and the Republican Party. He was initially a Mennonite but became Presbyterian in 1848. Stahl and Cassel each served as officers of the church together.¹⁰⁷ Stahl's grandson, Edmond L. Stahl, was nominated for W.I.G. at Temperance Hall on April 26, 1867.¹⁰⁸

Samuel F. Frey (12-16-1852/__) was Marietta's funeral home director and furniture dealer. Frey entered an apprenticeship with Henry S. Mayers of Mount Joy in 1868 to learn the trade of cabinetmaker and undertaker. In 1872 he came to Marietta and entered business. His first savings were invested in a stock of furniture and funeral supplies, and he rented a small shop in the Welchans building. In 1876, Frey married Anna H. Longenecker and had 5 children. In 1887, he bought the Roath property in the heart of the business district.¹⁰⁹

William Brown, 1975, 48 East Front Street, has worked with wood for eight years. He began creating furniture after his wife investigated the cost of a trestle table which she thought was far too costly. He obtained a

pattern that planned, laid out, and constructed the fine piece. The table has gone through the flood and is still a beautiful object. All the furniture made brown is held with dowel pins and glue, and most of it is fashioned in colonial style.¹¹⁰

James Sagris, a former owner of the property and now deceased, idealized the planting of 150 Kwanzan cherry trees along Front Street. He came up with the idea after seeing how passersby admired his personal Kwanzan cherry trees. Sagris, while sitting at his doorstep, ‘got the idea that it would be a great community project to plan a line of cherry trees along the length of the street. Not only would they add beauty to the street and present a tremendous visual impact, but they would serve as a buffer for some of the noise from the trains passing through the borough.’ Approximately 150 holes were dug at 25-foot intervals, and the trees were placed in each hole. The trees' full color is usually during the last week of April. By 1992 the entire tree line was established and ready for dedication. In 2005, the first “Cherry Blossom Festival” took place.¹¹¹

James Sagris initiated the planting of cherry trees along Front Street in 1992

Furthermore, the Marietta Beautification Committee, organized in 2010 and emanated from the “Tree Line Care” group, coordinates the care of the strip on cherry trees., For this purpose, an inground bronze plaque was placed on the line opposite 48 East Front Street. Outside this project, Sagris lived as an art dealer, conservator, and ceramic restorer.¹¹²

Kurt Steinman has worked at Machine Operator, Assemblers, and Inspectors Occupations. Steinman was keen on maintaining the home's unique landscape and is noted as being included in the 10th annual Marietta Garden Tour in 2003.¹¹³

The property was owned by many veterans, including Isaac Hoffman, who served in the Civil War and William Brown, who served in WWII. It is also speculated that James Rice Jr. served in the Korean War.¹¹⁴

The property has endured the ebbs and flows society has to offer from construction to the present day. Overall, Marietta flourished during the nineteenth century due to the convenience of residing along the Susquehanna River and the Pennsylvania Railroad. However, it began with Marietta citizens serving in the Armed Forces of the War of 1812.¹¹⁵

Commerce developed with the completion of the Pennsylvania Canal (1833) and the railroad between Harrisburg and Columbia (1850). Local entrepreneurs developed thriving iron and lumber businesses. Immigrant workers and rivermen gave the town a reputation for rowdiness that contrasted with its academic and religious aspects.¹¹⁶ Events of wars, natural disasters, and innovation have all supplanted their places in history alongside this home on 48 East Front. The world’s longest-covered bridge once spanned the Susquehanna River between Columbia and Wrightsville. Built in 1814, it was more than one mile long. Unfortunately, it was destroyed by ice and high water in 1832.¹¹⁷ Moreover, the civil war resulted in historical events such as the burning of the Columbia-Wrightsville bridge to hinder Confederate advancement. Between 1861-1865, Mariettians were occupied by the Battle of Gettysburg in mid-1863.¹¹⁸

The Union of the civil war played a fundamental role in eradicating slavery. After the war, innovative methods contributed to the birth of the smallpox vaccine.¹¹⁹ Years later, the United States entered the First World War. During the Second World War, in 1941, the U. S. military expanded the Marietta Holding and Reconsignment Point and officially designated the Marietta Transportation Corps Depot.¹²⁰ Annexation of areas east and west of the town increased the borough's boundary in the 1970s.¹²¹ Depressions periodically devastated local commercial and industrial enterprises. Recurrent floods and ice jams sometimes wreaked havoc on the town, especially in 1936 and 1972.¹²² Following these natural disasters, 45 % of Marietta gained historic preservation status in 1978.¹²³
