

Honors 201 – Public Heritage Studies 201: Elizabethtown History: Campus and Community

## Market Street Marietta, Pennsylvania: 300 Years of Economics Along the Susquehanna River

Ruth M. Jacob  
19 April 2022  
Professor Jean-Paul Benowitz  
Elizabethtown College

### **Stibgen-Musselman Manse** **3 East Market Street Marietta, Pennsylvania** Corner of East Market Street & Blackberry Avenue

#### **Abstract:**

Constructed in 1820, by the Marietta & Susquehanna Trading Company and United States Bank of Marietta, the house was razed and in 1840 the present home was constructed by lumber merchant Christian Stibgen, in the Italianate style. Ironmaster Henry Musselman, Constable for West-Hempfield Township and four generations of his family lived in this house. Ironwork architectural details on the house illustrate the history of the iron industry in Marietta's economic history. The small building to the west of the house served as the counting house for Musselman's iron furnaces. The last Musselman family resident, Henry Musselman's great-granddaughter, Mary Montgomery, instructed through her will, for the house to be razed after her death. In 1968 Mrs. Montgomery liquidated all of her assets, the house was sold, and subsequently, it was saved.

## Prologue:

This is one report in a collection of seventeen reports about historically significant properties in Marietta, Pennsylvania a National Historic District. These reports form a collective study entitled, “Market Street Marietta, Pennsylvania: 300 Years of Economics Along the Susquehanna River.”

The major corridor for transportation in every British community is historically called High Street. When William Penn laid out the city of Philadelphia he planned for a High Street in the English tradition. William Penn introduced a new concept to British towns, the establishment of a public market in the town center square.

Philadelphia set the standard for every town planned in Colonial America, a public market situated at the cross roads of High Street and the cross street leading to the nearest river, thus creating a Center Square. In time all High Streets in the United States were re-named Market Street.

As in the case with Philadelphia, every Market Street in America became the most important thoroughfare where business, finance, economics, political power, and culture were established and evolved.

The Center Market Square in Marietta is situated at the intersection of Market and Gay Streets. Market Street runs east and west, parallel to the Susquehanna River, while Gay Street runs north and south leading from the Market Square to the Susquehanna River.

Marietta was created through the incorporation of several neighboring villages: Irishtown, New Haven, Waterford, Moravian Town (Bungletown), and technically Chickies where the iron industry was concentrated. Market Street had many names as it crossed through these hamlets, including United States Street in Irishtown, which was re-named Market Street when it was incorporated into Marietta in 1967.

Market Street in Marietta takes a circuitous route as it is a continuous winding thread linking the “main street” in each village which joined together to make Marietta.

These reports seek to re-create life in Marietta on Market Street along the Susquehanna River. The homes, counting houses, warehouses, taverns, restaurants, hotels, public houses, serving the coal and lumber yards, the iron furnaces and

transportation systems of the river, canal, and the rail road.

In 2014, Arcadia Publishing (Charleston, South Carolina) published a book entitled, Elizabethtown College as part of their *Campus History Series: Images of America*, authored by Jean-Paul Benowitz, who teaches History at Elizabethtown College. In 2015, Arcadia Publishing asked Jean-Paul to write a history of Elizabethtown Borough, published under the title, Elizabethtown: Images of America. In the fall semester of 2016 Elizabethtown College began offering an Honors First Year Seminar, taught by Jean-Paul, called “Landmarks and Legends: Learning Local History.” In the spring semester of 217 Elizabethtown College began offering an Honors research methods course, taught by Jean- Paul called, “Elizabethtown History: Campus and Community.” These courses helped Elizabethtown College secure a Mellon Grant, in 2018, called “Confronting Challenges with Confidence: Humanities for Our World Today.”

Jean-Paul’s courses were supported by this grant as part of the “Development and Delivery of Global and Regional Heritage Studies Courses/Experiences.” The Mellon Grant and these local history courses led to the creation in 2019 of a Certificate in Public Heritage Studies for History majors at Elizabethtown College.

These courses are based, in part, on The National Collegiate Honors Council program called “Partners in the Parks.” This is an outdoor experiential learning program offered through a collaboration between NCHC and the National Park Service. NCHC also offers programming called “Place As Text” where students immerse themselves in the local community exploring the culture and geography of the local neighborhood. Students are challenged to be sensitive and reflect about the human experience in the local built environment.

In the spring of 2016 the course, “Elizabethtown History: Campus and Community,” involved a partnership with the Lancaster Preservation Trust and Elizabethtown Borough. Students conducted archival and field research in an effort to prevent the historically significant Moose Lodge building in Elizabethtown from being razed. This successful historic preservation project attracted the attention of the Architectural Historian for

Pennsylvania Department of Transportation Engineering District 8.

In the spring of 2017 the course, “Elizabethtown History: Campus and Community,” involved a partnership with PennDOT. Students engaged in archival and field research to conduct National Historic Preservation Act Section 106 Reviews of local historic properties. Student research findings were published through the digital humanities project: ArcGIS story maps. Students’ reports were used by PennDOT, Elizabethtown Borough, and the federal Department of Transportation regarding historic preservation initiatives and public works projects concerning rebuilding the Market Street Bridge.

In the spring semester 2019, the course, “Elizabethtown History: Campus and Community,” involved a partnership with RiverStewards, Inc. The students conducted NHPA Section 106 Reviews of historically significant properties in the Marietta Historic District(s) and the Chickies Historic District. The students published their findings online through an ArcGIS map. The students presented their findings at Scholarship and Creative Arts Day (SCAD) at Elizabethtown College on Tuesday 16 April 2019 and at Marietta Day on Saturday 11 May 2019 in Marietta. One of the students in the class, Kyle C. Cappucci, expanded the project for a Summer Scholarship, Creative Arts, and Research Project (SCARP) in the summer of 2019. Cappucci broadened the Community Based Learning project to include Marietta Restoration Associates, Inc.; RiverStewards, Inc.; Rivertownes PA USA, Inc.; and Susquehanna Heritage, Inc. Cappucci expanded the scope of the map beyond historical significance to illustrate the contemporary relevance of Marietta.

Cappucci presented his scholarship to the Marietta Borough Council meeting on Tuesday 9 July 2019 and to the general public at the former First National Bank on Wednesday 17 July 2019. His presentations entitled: “Putting Historic Marietta on The Map: This Place Matters!” illustrated how the scholarship by the Honors students at Elizabethtown College can bring positive attention to the Marietta Historic District, the Chickies Historic District, and the Northwest Lancaster County River Trail. To this end, Cappucci suggested the Marietta Restoration

Associates, Inc. take the lead in launching a historic preservation awareness campaign created by the National Trust for Historic Preservation, called “This Place Matters!”

“This Place Matters!” a national campaign, created by the National Historic Preservation Trust, encouraging people to celebrate places meaningful to them and to their communities. Since 2015, participants have shared more than 10,000 photographs of themselves and their favorite places on social media using the hashtag #ThisPlaceMatters.

In the summer of 2020, Kyle Cappucci worked, in the remote, on an Elizabethtown College Summer Scholarship, Creative Art and Research Program Project entitled: “This Place Matters! The National Trust for Historic Preservation and Economic Revitalization in Marietta, Pennsylvania.” Through this SCARP project Elizabethtown College partnering with various stakeholders in Marietta, will be launching a This Place Matters campaign for Marietta. This campaign is not just public awareness through photography and social media. It is about telling the stories of why these places hold historical significance. Through This Place Matters, the National Historic Preservation Trust, encourages and inspires an ongoing dialogue about the importance of place and preservation.

In the summer of 2021 Kyle Cappucci will commence work on a Elizabethtown College Summer Scholarship, Creative Art and Research Program Project entitled: “Ecological and Economic Revitalization Through Historic Preservation of the Northwest Lancaster County River Trail in the National Historic District of Marietta, Pennsylvania” which will serve as the basis for his Honors in the Discipline Senior Thesis. Cappucci is exploring the relationship between historic preservation and economic development in Historic Districts.

This is one report, in a series of seventeen reports being used to inform the Marietta This Place Matters campaign.

*Jean-Paul Benowitz*  
Thursday 11 January 2022

### Property Details:

3 East Market Street in Marietta Borough, Pennsylvania, is estimated to have been built around 1820<sup>1</sup>, however a newspaper clipping from 1867 states that the mansion that stands there today was constructed sometime after the 1840s<sup>2</sup>, and information offered in the deed search of this house, narrows that down between 1841<sup>3</sup> and 1862<sup>4</sup> based on the change in description of the property. The property contains a main house and several conjoined structures, including a counting house. The main section of the dwelling is three stories and 3360 square feet, containing a basement of 1120 square feet. A second subsection of the property is two stories, making up 800 square foot and a 400 square foot basement. There is also a back, smaller structure known as the “counting house”<sup>5</sup> as aforementioned, that is one story, 265 square feet, with an equal sized basement. Off the back of this counting house is an enclosed structure of 20 square feet. The property has five slab porches of various sizes: 70 square feet, 95 square feet, 90 square feet, 100 square feet and 120 square feet. Each of the porches on the property have roofs. The property also contains a 220 square foot paved deck. The property, in total is 8712 square feet for the primary homesite and 3920 square feet for the residual land.<sup>6</sup>

### Deed Search:

The mansion at 3 E. Market Street was beautified by Martha Stigben and her husband Christian Stigben<sup>7</sup>, following the purchase of the property in 1862 from Aaron and Catherine Gable<sup>8</sup>, who bought it from the U.S. Bank in 1841<sup>9</sup>. After the Stibgens’ beautification, the property was purchased by wealthy Marietta Ironmaster Henry Musselman in 1867<sup>10</sup>. The Musselman family owned this house for about a century. When Henry Musselman died in 1898, the house was passed to his wife, until she died in 1908<sup>11</sup>. The heirs of her estate (Ellen M Montgomery, Anna Musselman, Annie B Musselman, Henry P. Musselman) finally transferred the deed of this house to Mary Montgomery, the great-granddaughter of Henry Musselman in 1938<sup>12</sup>, where she lived until 1968 when the house was then transferred to Paul E. and Mary P. Porter<sup>13</sup>. Notably, Mary Montgomery wanted the house to be demolished in her will, however this plan was never set in place due to unknown circumstances that forced her trustee, W. Arthur Campbell (as of 1965)<sup>14</sup>, to liquidate her real estate holdings before she died<sup>15</sup>. From the Porter’s, the house then went to Catherine C. Barley in 1974<sup>16</sup>, D. James Barnett & Madeleine E. Barnett in 1977<sup>17</sup>, James F. and Sarah S. Cahalan in 1978<sup>18</sup>. It is noted here in the deeds that East Market St. was previously referred to as Second Street and North Waterford Ln. was previously Elbow Ln. From the Cahalan’s, the property was transferred to Christopher and Elizabeth Hasircoglu in 1997<sup>19</sup>, Aiyana and James Ehrman in

2005<sup>20</sup> and Lesley A. Smith in 2008<sup>21</sup>. Ms. Smith then transferred the property to herself using her married name, Lesley Fregede (2011)<sup>22</sup>, and from there the current owners, Celeste R. and Thomas J Banks, purchased the property from Lesley and her husband John Fregede<sup>23</sup>. Throughout the history of this property it is also notable that the square footage has remained unchanged at 464.52 sq. ft. since 1862, evident in all of the deeds.

### Architectural Style:

The Stibgen-Musselman manse has two sections, the front being 28' x 40', and the back being 16' x 25'. The counting house attached is an additional 14' x 19'<sup>24</sup>. The Architect of this building is said to be Christian Stibgen and his wife, Martha, who allegedly started construction on the house in 1863<sup>25</sup>. The architectural style of the property is Italianate Victorian, denoted by the 4 pane windows (2 over 2), the 3-story height, the low-pitched roof and the cornice with decorative brackets<sup>26</sup>. These decorative brackets differ from the counting house, which has Dentils. The house additionally has a five bay façade and common bond brickwork<sup>27</sup>. Another well-known feature of this house is the intricate iron-work porch, a feature that may have been common in Marietta during the booming iron industry<sup>28</sup>. One potential reason that this house has retained its ironwork and not the others in this area is attributed to the need of regular repainting to fight corrosion<sup>29</sup>, something that would potentially get tedious for home owners without the resources that Henry Musselman and his family possessed. Another speculation to the ironwork on this manse, is that it was a way for Henry Musselman to showcase the capabilities of his iron furnaces, a reasoning that aligns with Musselman's other mansion located in Mount Pleasant that contains the same style ironwork porch<sup>30</sup>.

No known changes have been made to the home since the Stibgens "beautified" it in the 1860s<sup>31</sup>, however, a clear change had been made to the building between 1841 and 1862. When Aaron Gable purchased the property in 1841 from the U.S. Bank, the deed outlines a one-and-a-half story structure<sup>32</sup>, but when Gable sold the property to the Stibgens, that smaller structure had already been transformed into the three-story building that stands there today<sup>33</sup>. A newspaper column by an unknown writer in 1867 confirms this change and solidifies that the Manse was not built any earlier than 1841<sup>34</sup>, while the deed search confirms that it could not have been built after 1862<sup>35</sup>. The writer then goes on to explain a little about the house that predated the Stibgen-Musselman Manse, discussing the room he resided in when he had stayed there with his new wife and mother-in-law back in the 1830s<sup>36</sup>. His description places a bedroom on the first floor, with a window opening to the garden (presumably where the back lawn is today), another window opening towards the alley, a central door that linked the bedroom to another, and

<sup>36</sup> Ibid

a door off of that room which was directed towards Elbow Lane (now Waterford Ave.)<sup>37</sup>.

Christian Stibgen is credited with constructing the Manse that is located at 3 E. Market Street<sup>38</sup>, however the deeds between Gable and Stibgen as well as the article from 1867 show that if Stibgen did indeed construct the Manse, then it was before he came into the ownership of the property, and the demolition of the old tenement and construction of the new one was overseen by Gable<sup>39</sup>. Stibgen, as seen in his obituary, was a very prominent figure in Marietta, primarily his influence in the lumber and construction industry<sup>40</sup>. It is possible that Stibgen did construct the house because of his local influence on projects such as this, but also because the house is nearly identical architecturally to a building, he is confirmed to have built<sup>41</sup>: the Episcopal parsonage<sup>42</sup>.

## History of Marietta, Pennsylvania

### *Founding Families of Marietta*<sup>43</sup>

Marietta was established in the eighteenth century which is in contrast to some histories of the community placing the origins between 1800-1812. Marietta was settled by Scotch-Irish Presbyterians and Swiss German Mennonites which is in contrast to some histories claiming the community was settled exclusively by Scotch-Irish Presbyterians. The Scotch-Irish Presbyterians founders focused on transportation along the Susquehanna River and Pennsylvania Canal, while the Mennonites founders initiated lumber production and related industries. Both entrepreneurial founding groups relied on transient workers.

Initially British fur traders, competing with French fur traders, established economic relations with indigenous populations along the Susquehanna River. Welsh fur trader Robert Wilkins was likely born around 1672 in Brecon, Wales,<sup>44</sup> arrived in the Marietta area sometime before 1702, at which time he married Elizabeth Ross in Lancaster County.<sup>45</sup> Wilkins first settled along the Conestoga Creek, next to Richard Carter who settled Warwick Township. In 1718, Wilkins took up 200 acres of land along the Susquehanna River, and in 1727 he sold it to The Reverend James Anderson, primary founder of Marietta.<sup>46</sup>

The Reverend James Anderson (1678-1740), educated at Edinburgh, Scotland under the care of Principal Stirling,<sup>47</sup> served The Donegal Presbyterian Church. Born in Scotland ordained by Irvine Presbytery, 17 November 1708 in Virginia. Anderson arrived in the Rappahannock, Virginia on 22 April 1709, before settling in New Castle, Delaware in 1717 later accepting a call to a congregation in New York City, which, at the time was worshipping in the City Hall. On 24 September 1726, he received a final call to the Donegal Presbyterian Church in Mount Joy. He was installed the last Wednesday in August 1727.<sup>48</sup>

Wilkins' neighbor, George Stewart (1683-1759), from Donegal, Ireland,<sup>49</sup> was elected as one of the first Commissioners of Lancaster County at its formation in 1729 and elected to the Provincial Assembly in 1732 dying soon after his appointment.<sup>50</sup> After George Stewart passed, his son John Stewart (1705-1749) inherited the

<sup>50</sup> Ibid.

land and sold it to David Cook, sometimes spelled Cooke. John Stewart was married to Ann Anderson (1716-1816), the daughter of The Reverend James Anderson.<sup>51</sup>

David Cook (1721-1786), sometimes Cooke, was born in Lancaster County and is buried in The Donegal Presbyterian Church Cemetery, Mount Joy.<sup>52</sup> Eventually, David Cook sold this land (purchased from John Stewart), to Jacob Heistandt Neff,<sup>53</sup> the middle and last name represent two prominent Mennonite families and surnames in Lancaster County and specifically the Marietta area. Jacob Heistandt Neff (1727-1798) was from Manor Township.<sup>54</sup>

Marietta was founded by leaders and members of two prominent churches in Mount Joy. The Donegal Presbyterian Church (1732) and the Mount Joy Mennonite Church (1790). The Donegal Presbyterian Church was founded in 1727 with the church being built in 1732. The Reverend James Anderson (1678-1740), primary founder of Marietta, was the minister.<sup>55</sup> The Mount Joy Mennonite Church was founded in 1790, with members meeting for worship in their homes, as was the custom of the time and remains the practice of the Old Order Amish. In 1812 a log meetinghouse on land donated by Peter Delebaugh Kraybill (1784-1869).<sup>56</sup> The first minister of The Mount Joy Mennonite Church was The Reverend Jacob Hostetter Hershey (1747-1819).<sup>57</sup> Both The Reverend Jacob Hershey and Peter Kraybill are buried at the Kraybill Mennonite Cemetery in Mount Joy.<sup>58</sup>

This points to the significance of the Presbyterians and Mennonites settling in Lancaster County after arriving in Philadelphia and Delaware, eventually realizing the economic significance of developing the land along the Susquehanna River associated with westward expansion of the nation. The early settlers settled in Mount Joy and not within the dangerous flood plain of the Susquehanna River. It also demonstrates the socio-economic bias of the settlers, believing poor lives were dispensable, poor transient workers living and working along the Susquehanna River, if they lost their lives and/or livelihood from flooding or from rowdy living, there are many histories of the community documenting drunken brawling in taverns, pubs, and hotels, the lives of these transient workers were not important, while the wealthy, benefiting from commerce along the Susquehanna River and Pennsylvania Canal, lived on higher safer ground in Mount Joy.

### *The Pennsylvania Canal & Marietta, Pennsylvania*

The next time you are on the Northwest Lancaster County River Trail (2007) in Marietta, imagine the path of the Pennsylvania Canal (1824-1900) running parallel to the Susquehanna River. Take a moment to consider Nebuchadnezzar, the great ruler of Babylon in 500 B. C., remaking a canal which is believed to have first been dug more than a thousand years earlier. The Nebuchadnezzar Royal Canal connected the Tigris and Euphrates Rivers.<sup>59</sup> Imagine China's Grand Canal, a UNESCO World Heritage Site, 1,000 miles long connecting Hangzhou and Tientsin, built in 500 B. C. Reflecting on how there are more than 26,000 miles of canal in all parts of the world, suddenly Marietta feels much older and more connected to the world than it seems today.<sup>60</sup>

When you walk around Marietta and you come across the Duffy-Rottmund House (1863) on Market Street, formerly Irishtown, think about Colonel James Duffy (1818-1888) as a boy, growing up along the Susquehanna River, working on the log rafts as a draftsman until earning the rank of pilot and making a successful career in river transportation.<sup>61</sup> In 1846 he traveled through Europe making a study of canals and returning to

Marietta he fulfilled his goal of making the Pennsylvania Canal through Marietta a major corridor for transporting coal. By 1848 Colonel Duffy established a line of boats for transporting coal from Pottsville to New York, in the interests of the Schuylkill Navigation Company.<sup>62</sup>

When you think about Marietta and the Pennsylvania Canal remember it was based on a model established in 1639 when Mother Brook, the first canal was built connecting the Charles and Neponset Rivers in Dedham, Massachusetts.<sup>63</sup> From the beginning, Americans accepted waterways as the best method of traveling, or for moving goods from one place to another.<sup>64</sup> Construction on the Pennsylvania Canal started in 1824, it was a system of canals, dams, locks, tow paths, aqueducts, viaducts, tunnels, and bridges facilitating shipment of heavy bulk goods between Philadelphia (1682) and Pittsburgh (1758). The Pennsylvania Canal System developed in response to the growing markets in the Northwest Territory reached by the Ohio River through connecting the Susquehanna, Juniata, Conemaugh, Kiskiminetas, and Alleghany Rivers.<sup>65</sup> When finished in 1834 the trip from Philadelphia to Pittsburgh, via the Main Line of Public Works (1826), could be made in three to five days. By 1830, more than 4,000 miles of canals in New York, Pennsylvania, Maryland, Virginia, Ohio, and Indiana were started or planned between 1825 and 1845.<sup>66</sup>

The wonder of it all was the fact there were no American engineers at the time, and neither was there any excavating machinery. With no more than the ingenuity of local surveyors and such simple tools as shovels and wheelbarrows, these artificial rivers were cut through the most difficult countryside.<sup>67</sup> The equally amazing thing is how the canals are still functioning. Today we find modern railroads using ancient canal beds for their own track beds. Sometimes we drive through a high-walled section of farmland which was first a canal way before it became a highway. We might have thought a ditch running parallel to a railroad was for drainage. Actually it was once a canal; the present railway tracks are built on what was once the tow path. Or we might come upon some lofty bridge piers across a river where there is no roadway: we would hardly suspect they once held a wooden aqueduct and canal way, carrying it and the canal traffic high across the roaring river below.<sup>68</sup>

The Pennsylvania Canal was not the only waterway serving the local economy of Marietta. In 1797 the Conewago Canal began carrying riverboats around the Conewago Falls on the Susquehanna River near York Haven.<sup>69</sup> The Susquehanna and Tidewater Canal, built between 1836-1840, connected Wrightsville (1811) with Havre de Grace, Maryland (1785). The Susquehanna and Tidewater Canal facilitated transportation of lumber, coal, and raw materials from Marietta (1719) and Columbia (1724) to the Port of Baltimore (1729).<sup>70</sup> This is the reason why the economy in Marietta was built on lumber, coal, whiskey, and transportation.<sup>71</sup>

The origins of the Pennsylvania Canal date back to 1690 when William Penn proposed building a canal connecting Philadelphia with the Susquehanna River. It took 102 years until in 1792, as an initiative of the Washington administration (1789-1797), the Union Canal, was completed in 1828. Running eighty-two miles, the Union Canal connected Middletown (1755) on the Susquehanna River to Reading (1748) on the Schuylkill River.<sup>72</sup> By 1834 the Main Line of Public Works, composed of interlocking canals, was transporting passengers and freight across 1,243 miles. Incrementally the canals system was integrated into and eventually replaced by

the rail roads. In 1859, one hundred and sixty-nine years after William Penn's canal proposal, all canals owned by the Commonwealth of Pennsylvania were sold. The Pennsylvania Rail Road (1846) formed the Pennsylvania Canal Company and continued to use canals for freight transportation. The canal business, however, declined steadily in the last quarter of the nineteenth century, and most Pennsylvania canals no longer functioned after 1900.<sup>73</sup>

The last canal boat to enter Marietta was in August of 1900. Captain Morris Nagle piloted a canal boat carrying coal from Nanticoke (1800) in Luzerne County. Captain Nagle docked the boat at Gay Street. The boat was dismantled and buried beneath the railroad bed when the Pennsylvania Rail Road was installed over the canal tow path.<sup>74</sup> In Marietta, along the Pennsylvania Canal boats were drawn by mules guided along the tow path parallel to Front Street.<sup>75</sup> A double canal boat could handle up to 250 tons of freight with a single mule team on the tow path.<sup>76</sup> In the winter the canal was drained to minimize damage from ice blocks and in the spring flooding (good for river transportation) washed out sections of the canal.<sup>77</sup> The last log raft to float down the Susquehanna River to Marietta landed on 12 April 1911.<sup>78</sup> Thus in the transition from the nineteenth to the twentieth centuries, transportation along the Susquehanna River and the Pennsylvania Canal were entirely replaced by the rail road network, changing the physical landscape of Marietta and the culture as well.

### *History of Marietta, Pennsylvania*<sup>79</sup>

As early as 8,000 BC Paleo-Indian settlements, the Susquehannocks flourished along the Susquehanna River with agricultural production and operating complex trade routes expanding throughout the continent. Every river valley and every tributary of the Swatara, Conoy, Chickies, Conestoga, Pequea, and Octorara Creeks has considerable evidence of human habitation in Lancaster County, Pennsylvania prior to European contact.<sup>80</sup>

In 1616 Etienne Brule (1592-1633) a French expert in the Algonquin language, who lived among the Susquehanna tribe in western New York, traveled down the Susquehanna River into the Chesapeake Bay. Along the way, Brule explored the tributaries of the Susquehanna River in Lancaster County and encountered the Susquehannock tribes living along the Susquehanna River.<sup>81</sup>

In 1629 Etienne Brule partnered with the British fur trader Sir David Kirke (1597-1654) establishing trade relations between the Europeans and Susquehannock tribes. By 1680-1690 no Susquehannock villages existed in Lancaster or York Counties. There was a migration to New York to settle among the Iroquois and Seneca and a movement south to Maryland.<sup>82</sup>

In 1681 British King Charles, II (1630-1685) granted a land charter to Quaker leader William Penn (1644-1718) to repay a debt the King owed to Admiral William Penn (1621-1670). King Charles named it Pennsylvania, meaning Penn's Woods: Penn and Sylvania from the Latin *silva* which translates forest or woods. There were no Susquehannocks living in this region by the time William Penn acquired the land from King Charles, II (1630-1685).<sup>83</sup>

In 1701 William Penn (1644-1718) gave a patent of 3,000 acres of land along the Susquehanna River to George Beale (British). By 1703 Consumed by debt, William Penn (1644-1718) charged his land agent James Logan (1674-1751) to send him in London “bear and buck skins for they [the creditors] bear an advance” and “urge the Pennsylvania assembly to establish a propriety monopoly in the Indian trade.”<sup>84</sup>

In 1708 James Logan invited the French Expert Indian language interpreter Peter Bezaillion (1661-1742) to establish a fur trading post where the Conoy Creek meets the Susquehanna River in Bainbridge, Pennsylvania north 7.5 miles north of Marietta. By 1719 Bezaillion invited the Piscataway tribe to move from Maryland to Conoy Town. They assumed the name Canoise or corn shellers and were called the Conoy Indians.<sup>85</sup>

In 1717 Peter Logan did not only invite French and Indian fur traders to settle between the Conoy and Conewago Creeks along the Susquehanna River, he also sold land to the highest bidders among the Swiss-German (mostly Mennonite) Palatine farmers arriving in Pennsylvania in 1717. Simultaneously there was an influx of Ulster Scots or Scots-Irish settlers. William Penn’s sons John (1700-1746), Richard (1706-1771), and Thomas (1702-1775) inherited a great deal of debt when their father died in 1718. The Penn brothers became alienated from Quaker beliefs and did not subscribe to their father’s ideals for Pennsylvania.<sup>86</sup>

In 1717 one year before his death, William Penn reserved 16,000 acres in Lancaster County for various tribes as a reserved hunting ground. This promise by William Penn would not be kept by his sons. According to Mennonite historian the Reverend John L. Ruth, Mennonite settlers in Lancaster County anxiously paid up to four times more than the price the Penn brothers were asking for acres. Meanwhile the Scots-Irish settlers encouraged to move here by James Logan started living on the land without title. The obvious defense of one’s claim to property was to construct buildings and begin to improve the land, even before it was legally acquired.<sup>87</sup>

In 1719 Robert Wilkins, Scotch-Irish (Ulster Scots; Anglo-Irish Presbyterians), Indian Trader, acquired 300 acres along the Susquehanna River north of Chickies Creek. In 1719 George Stewart, Scotch-Irish, was sold a tract of land east of the Robert Wilkins tract. In 1727 Robert Wilkins sold the tract of Penn land to Scotch-Irish, The Reverend James Anderson, clergy at the Donegal Presbyterian Church (1732) in Mount Joy, in East Donegal Township. Son James Anderson operated the ferry and built the Accomac Inn.<sup>88</sup>

In 1733 George Stewart’s son and daughter-in-law, John and Ann Stewart, inherited and sold the James Anderson tract to David Cook. This tract of land was given to his son David Cook whose son, David Cook, laid out the town of New Haven. Additional acres of the Stewart tract were given to David Cook’s son James.<sup>89</sup>

Peter Bezaillion built Old Peter’s Road, as it is still known in parts of Lancaster County, to facilitate French and Indian fur trading linking Philadelphia to Bainbridge (1719). Bezaillion who, in partnership with the British, challenged France’s control over the territory between the Appalachian Mountains and the Mississippi River, a struggle which helped precipitate the French and Indian War. The French found the Algonquin tribes their allies, while the Iroquois sided with the British. Raids of British colonists occurred on both sides.<sup>90</sup>

By 1743, The Piscataway tribes had moved away from Bainbridge, migrating north along the Susquehanna River settling in Shamokin. British victories in Quebec (1759) and Montreal (1760) led to France surrendering all of New France to the British. The British took over all French forts on the frontier and became the new authoritarian power for the tribes in these regions during The French and Indian War (1755-1763).<sup>91</sup>

Between 1775-1783 Marietta played an important role in the American Revolution manufacturing iron and lumber, producing agricultural goods, distilling whiskey, and ferry transportation between Lancaster and York Counties over the Susquehanna River. The capitol of Continental Congress was in Lancaster City on 22 September 1777. Lancaster City was the capitol of Pennsylvania from 1799-1812. York City was the capitol of the Continental Congress from 1777-1778. The Articles of Confederation were drafted and adopted in York thus

<sup>91</sup> Ibid.

the establishing the first constituting and government for the United States of America. In 1789 Quaker leader Samuel Wright renamed Wright's Ferry as Columbia and petitioned the new U. S. Congress to make this the location of the U. S. Capitol.<sup>92</sup>

In 1804, the third generation of Anderson, grandson James Anderson, laid out the town of Waterford. By 1812, James Anderson and James Cook procured a charter from the Pennsylvania legislature and named their incorporated towns Marietta. The next year, 1813, Anderson's town Waterford and Cook's town New Haven were consolidated including a tract of land owned by John Myers east of Moravian Town and a tract of land owned by Benjamin Long north of Waterford.<sup>93</sup>

In the same year, 1813 John Pedan, James Mehaffey, and Colonel James Duffy purchased 161 acres west of the Anderson tract and laid out Irishtown. The founders named each north-south street after U. S. naval heroes: Biddle, Jones, Decatur, Bainbridge, Morris, Hull, and Porter. The east-west streets named for American sea vessels: Essex, United States, Wasp, and Constitution. United States Street would become Market Street when all the towns were incorporated into the borough of Marietta.<sup>94</sup>

The next year, 1814, the Cassels sell the Neff tract to Jacob Grosh who laid out Moravian Town, known locally as Bungletown. By this time the major industry in Marietta was lumber. By 1814 there were nine lumber merchants in Marietta. Planing mills, lumberyards, carpentry shops, and allied businesses were the backbone of the local economy. Marietta was a waypoint for shipping lumber, bundled into rafts, downriver. In 1807 Henry Cassel established a lumber business on the corner of Third and Bank Streets. In 1848 Henry Cassel was joined by his son A. N. Cassel who in 1872 built a planing mill associated with the business. In 1850 B. F. Hiestand & Sons Planing Mill was established on the Susquehanna River below Chickes Rock with the lumber offices located on the corner of Bank and Second Streets. In 1945 the Hiestand lumber properties were deeded to the Paul W. Zimmerman Foundries Company manufacturing brass, bronze, and aluminum castings. In 1954 Zimmerman Foundries Company, was acquired by the Donegal Manufacturing Corporation, later called Donegal Steel Foundry Company which manufactured carbon, low alloy and stainless steel castings primarily for tanks for the U. S. Army during the Korean War (1950-1953).<sup>95</sup>

During 1812-1814, The Columbia-Wrightsville covered bridge constructed over the Susquehanna River, at the time considered the longest covered bridge in the world. Greatly enhances the economy for Marietta. Between 1812-1815 the War of 1812 between the U. S. and Great Britain began over alleged British violations of American shipping rights, such as impressment, the forcing of American merchant sailors to serve on British ships. American forces unsuccessfully invaded Canada and the British retaliated by burning down Washington, D. C. Within weeks U. S. Forces repulsed sea and land invasions of the British at the Port of Baltimore, particularly Fort McHenry. The war ended with victory for the United States at the Battle of New Orleans. Two companies from Marietta marched to Maryland in defense of Baltimore. One of the companies was called the Marietta Grays commanded by Jacob Grosh.<sup>96</sup>

In 1817 James Anderson built a road over Chickies Mountain, the Old Columbia Pike, linking Columbia, Pennsylvania, formerly Wright's Ferry, (1726) 3.6 miles south of Marietta. Anderson was preparing for the state legislature to build a bridge across the Susquehanna River connecting Marietta to York, Pennsylvania (1741). James Anderson operated a ferry across the Susquehanna River. Two miles north Mennonite Christian Winiker operated a ferry known as Vinegar Ferry.<sup>97</sup>

The Economic Panic of 1819 was the first major peacetime financial crisis in the U. S. following the collapse of the economy in the transition from a colonial commercial status with Europe toward an independent economy. The downtown was driven by global market adjustments in the aftermath of the Napoleonic Wars, its

<sup>92</sup> Lloyd, Junie, YorkBlog, "How did they get across the wide Susquehanna when there were no bridges?"

<sup>94</sup> Ibid.

<sup>95</sup> Ibid.

<sup>96</sup> Ibid.

<sup>97</sup> Ibid.

severity was compounded by excessive speculation in public lands. The Pennsylvania legislature did not build a bridge between Marietta and York. James Anderson lost most of his money building the Columbia Pike.<sup>98</sup>

Between 1826-1840 construction of the Pennsylvania Canal system to connect Philadelphia (1682) to Pittsburgh (1669) commenced. The Pennsylvania Rail Road (1846) eventually purchased the Pennsylvania Canal from the Commonwealth of Pennsylvania.<sup>99</sup>

In 1855 Eagle Furnace, anthracite iron furnace, opened. The iron industry in Marietta was dominated by Henry Musselman, Henry Miller Watts of Carlisle, and his father-in-law Dr. Peter Shoenberger, of Pittsburgh. The local iron industry was managed by Watts' son Ethelbert Watts (1846–1919) a U. S. diplomat who played important roles in the Spanish American War, Russo Japanese War, & WW I. These iron plants produced pig iron, sold under the brand name Vesta, transported on the Pennsylvania Canal and later by the railroad. In 1917 the iron plants, known as the Susquehanna Iron Company, sold the furnaces to E. J. Lavino who produced ferromanganese, used for high grade steel, during WW I. The manganese ores came from all over the world & the ferromanganese product was shipped to Youngstown, Ohio, Coatesville, and Pittsburgh. The production of iron ceased in the 1920s and the furnace was dismantled between 1928 and 1934.<sup>100</sup>

Between 1861-1865, during the American Civil War Marietta played a role in the Battle of Gettysburg 1-3 July 1863. Women from Marietta organized to prepare linen bandages and baked two wagonloads of bread dispatched to Gettysburg, Pennsylvania (1806) 45 miles west of Marietta. Marietta was protected from an invasion of Confederate troops because on 28 June 1863 Union forces burned the Columbia-Wrightsville covered bridge to prevent an advance of Confederate troops approaching from Wrightsville, York County. The Pennsylvania Rail Road used the bridge piers to support a rail bridge crossing the river from 1868-1896 when it was destroyed by the Cedar Keys Hurricane. In 1810 David Muma built a stone house which David Cassel (1774-1855) turned into a hotel in 1823 called the Perry House Hotel named for War of 1812 Commodore Oliver Hazard Perry (1785-1819). Perry House was a stronghold for Confederate sympathizers of Marietta where Copperheads and Unionists engaged in hostile political debates.<sup>101</sup>

In the post-Civil War years, by 1876 The Marietta Holloware and Enameling Company was established, by Colonel James Duffy among others, producing hollow castings such as toilet bowls, lavatory basins, cast iron cookware, ink pots for stencils, glue pots, teakettles, and cookware including sauce pans, and skillets.<sup>102</sup>

In 1882 Dr. H. M. Alexander used the methods of British physician and scientist, Edward Jenner (1749-1823) to create a vaccine for smallpox which he manufactured and sold commercially nationwide and globally. The work began in a chicken house adjacent to his office at 299 West Market Street. He purchased the H. McMullen Farm in the Irishtown neighborhood of Marietta located at Wasp and Biddle Streets and established the first commercial biological laboratory in the United States known as Dr. H. M. Alexander and Company and also as the Lancaster County Vaccine Farm.<sup>103</sup>

By the time of the First World War, in 1916, the heirs of Dr. Alexander sold their shares of the company to the Gilliland Laboratories, Inc. During the Second World War, in 1943 Gilliland Laboratories was acquired by the American Home Products Corporation. The following year, in 1944, The American Home Products Corporation was incorporated into the Wyeth Laboratories, Inc. In 2005 Wyeth Laboratories was acquired by Britain's largest drugs maker, GlaxoSmithKline.

In 1889 Donegal Mutual Insurance Company, formerly Donegal and Conoy Mutual Fire Insurance Company, established on West Market Street in Marietta. During 1960-1961 Donegal built their national headquarters in Colonial Revival style campus on River Road Pennsylvania Route 441 (PA 441).<sup>104</sup>

In 1893 The Columbia and Donegal Electric Railway (C&D), later purchased by The Pennsylvania Traction Company which was acquired by the Conestoga Traction Company (1899) was chartered to build a trolley car line connecting the four miles between Columbia and Marietta and building the Chickies Rock Park. The wooden cars, painted bright blue with yellow trim, were purchased from J. G. Brill Car Company (1868-1954) Philadelphia and the electric lines were installed by Westinghouse Electric Company (1886) Pittsburgh. Trolley tickets were purchased at the Libhart Drug Store.<sup>105</sup>

During 1917-1918 the United States declared war on Germany on 6 April 1917 more than two and a half years after the start of the First World War. Before entering the war, the U. S. remained neutral although it was an important supplier to Great Britain and the Allied Powers. The U. S. made its major contributions supplying raw material for the war effort. The U. S. military established the Marietta Holding and Reconsignment Point along the Susquehanna River. The primary mission was to receive and store Quartermaster, Ordnance, Medical, Engineer, and Signal Corps supplies until east coast ports were in a position to receive and ship materials overseas.<sup>106</sup>

During the Second World War, in 1941 the U. S. military expanded the Marietta Holding and Reconsignment Point to accommodate supplying the Lend Lease Act. In March 1941 Lend Lease was enacted distributing food, oil, warships, warplanes, and weaponry. In December 1941, four days after the Japanese attack on Pearl Harbor and the United States, the U. S. Congress declared war against the Japanese Empire. Nazi Germany declared war against the U. S. in response to what was claimed to be a series of provocations by the United States when it was still officially neutral during the Second World War. The United States declared war on Germany.<sup>107</sup>

During this time, 1942-1945 there was an expansion of the Marietta Holding and Reconsignment Point which is officially designated as the Marietta Transportation Corps Depot. The depot encompassed over eight million square feet, over 400 acres, and employed more than 800 civilians in addition to military personnel.<sup>108</sup>

In 1947 Machinecraft, Inc. was established manufacturing automatic food shaping machines for mass production of hamburgers and French fries. The hydraulic valves for the first two air craft carriers built during the Second World War were designed and manufactured by Machinecraft. This technology allowed planes to be kept on an even keel during take-off and landing on the decks of the ships.<sup>109</sup>

In 1952 Texas Eastern Transmission Corporation built a natural gas compressor two miles west of the Marietta Air Force Station. This compressor station moves natural gas destined for markets in Philadelphia and New York.<sup>110</sup>

Between 1953-1955 the Transportation Material Command was established at the Marietta Transportation Corps Depot with the mission of supply control, cataloging, procurement, mobilization planning, and standardization and production engineering. In 1955 Marietta Transportation Corps Depot was transferred from the U. S. Army to the U. S. Air Force which created air station with the primary functions of receipt, storage, shipment, and disposal of Air Force material and equipment.<sup>111</sup>

In 1955 the United States Aluminum Corporation of Pennsylvania USALCO is established. Rectangular twenty-five pound “ingots” smelted from scrap aluminum were produced to make castings for automotive automatic transmissions, pistons, aluminum fry pans, and products for national defense purposes.<sup>112</sup>

In May 1957, New Jersey Shell Casting Corporation was organized and operated until 1961 as a shell molding foundry. The corporation existed under the laws of the State of New Jersey from 1957 to 1979 because

Joe Nagy lived in New Jersey at the time of incorporation. In May 1957, the original one room block building on South Decatur Street in Marietta, PA was rented from the U.S. Expansion Bolt Company. On December 9, 1965, New Jersey Shell Casting Corporation purchased the block building from the U.S. Expansion Bolt Company. The original size of the building was 2,700 square feet. Due to the growing needs of the business, the foundry has been expanded over the years and currently houses over 18,000 square feet under roof. In 1962, the business was converted to a non-ferrous brass, bronze and aluminum green sand-molding foundry and remains as such today<sup>113</sup>

In the 1970s, a large part of the Marietta Transportation Corps Depot became the Armstrong World Industries Ceiling Manufacturing Plant. Currently part of the Marietta Transportation Corps Depot is owned by the General Services Administration (GSA). The GSA portion of the site is used for the storage of a variety of ores including manganese, chrome, beryl, zinc, and lead in the form of ingots. Access to both portions of the site is restricted by perimeter fencing which has either locked gates or is guarded. The current property owners are: AWI (302.4 acres); GSA (67.5 acres); AAAA Enterprises, Inc. (39.9 acres); PADOT (23.27 acres); Richard C. Yunginger (36.40 acres); and Frederick W. Bushong et ux (9.6 acres).<sup>114</sup>

This property is a superfund site which means the federal government, through the Environmental Protection Agency, has identified parties responsible for hazardous substances releases to the environment and has either compelled them to clean up the sites or it may undertake the cleanup on its own using the Superfund (a trust fund) and costs recovered from polluters by referring to the U. S. Department of Justice.<sup>115</sup> Sites managed under this program are referred to as “Superfund” sites established as the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. The EPA identifies sites such as Marietta Transportation Corps Depot because they pose or had once posed a potential risk to human health and/or the environment due to contamination by one or more hazardous wastes. Marietta Transportation Corps Depot is currently registered as an Active superfund site by the EPA. However, it is not on the NPL (National Priorities List), which means the EPA does not consider it one of the nation's most hazardous waste sites.<sup>116</sup>

Established in 1970, Lawn Equipment Parts Company (LEPCO) is a family-owned and operated wholesale distributor of quality outdoor power equipment, parts, and accessories. Originally, LEPCO operated as an after-market parts distributor to independent lawn equipment dealers. Today, we handle nine major brands of power equipment and continue to supply aftermarket parts to over 1,300 dealers in the northeast region. Over the years, LEPCO has continued to grow, becoming one of the preferred distributors in the industry. Maintaining their reputation for outstanding customer service to its dealers continues to be their everyday focus. LEPCO's continued goal is to provide quality products and services to groups of independent dealers who, in turn, can provide a higher level of service and support to the end-users for all the brands represented. They sell exclusively to retail dealers in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania.<sup>117</sup>

In 1981, Rich Kushner opened Swedish Motors at 7 North Decatur Street, advertising that his employees had a unique knowledge of Swedish cars and foreign parts. His niche was more than enough to preoccupy his technicians, some of whom have been with Rich since their service doors opened. Today, Swedish Motors offers the same reliable auto service while also selling and restoring preowned and vintage vehicles.<sup>118</sup>

Jagtrux, Inc, a contract/common carrier for tractor trailer transportation was incorporated in 1982 by Jim Germak. In 1998 Jagtrux, Inc. purchased an abandoned locomotive repair shop in Marietta, originally built in 1942, and completely renovated the building. Eventually Jagtrux acquired surrounding property and expanded into a seventy-five-acre facility with a full-service shop, cross dock facilities, and secure trailer storage lots.

Germak established a strong relationship with Armstrong World Industries becoming a Core Carrier for Armstrong's facilities in Marietta.<sup>119</sup>

B.N. Excavating is a second-generation family business, specializing in residential, commercial and agricultural excavating services. Bob Nafziger started the company in 1986, after working as an employee for an excavating company in the area for over 15 years. Bob started the company with a single backhoe, dump truck and track loader and steadily built relationships with area contractors to build the business. Today, B.N. Excavating has grown from a small, one-man operation to a trusted leader in the excavating industry throughout Lancaster County and beyond. Headquartered in Marietta, PA, the company is now home to an experienced team of full-time excavators and a diverse line of professional excavation equipment that can meet the excavating needs of small businesses, home owners and agricultural operations.<sup>120</sup>

R & T Mechanical, Inc. was founded in 1987. R & T Mechanical is a contracting company which provides services including plumbing, heating, air-conditioning, and other similar work. R & T is in the East Donegal Industrial Park along with several other companies and organizations including Hess Auctioneers, LLC, Jaxtrux, Inc, Vanguard Modular Building Systems., LLC, and Hiltz Propane.

Founded by Matt Hiltz, a mechanical engineer who has many years of experience in the propane industry, Hiltz Propane Systems is family-owned and operated and comprised of a dedicated crew of propane installation and repair professionals. Specializing in complete turnkey propane system design and installation services, Matt and his dedicated crew bring extensive experience to the table in the areas of LPG system design, engineering, plant connection, fitting and maintenance services.<sup>121</sup>

Established in 1998, Vanguard Modular Building Systems, LLC acquired Schiavi Leasing Corp., the predominate modular builder and regional supplier of modular classrooms in Maine since 1986, as a wholly owned subsidiary. Vanguard successfully expanded on Schiavi's already extensive modular construction capabilities to include distinctively engineered and designed multi-story permanent modular buildings, while retaining the requirements for temporary modular space of all sizes and configurations. Vanguard's experienced modular sales and construction management teams are in offices throughout the Atlantic and Gulf Coasts, enabling us to effectively serve more than 20 states. They provide construction management services and quality temporary and permanent modular buildings to the education, commercial, construction, healthcare, oil and gas, government, and religious markets.<sup>122</sup>

Hess Auctioneers, LLC began operations in June 2007 when John Hess (Hess Auction Group), Phil and Roger Garber (GFI Transport), and Jim Germak (Jagtrux), recognized a need for public truck, trailer and equipment auction and consignment auction in the Mid-Atlantic region. Since the company is conveniently located close to Harrisburg, Lancaster and York, the current site is convenient, secure and allows consignors to bring their equipment to the site in advance of the auctions, so buyers can preview the inventory.<sup>123</sup>

Lancaster Recumbent opened in December 2014, and today, the shop has over 75 different types of recumbent cycles – and continues to grow. The shop moved to a new location at 103 West Market Street in March 2018 – a larger space (for more cycles) located a block and a half off the Northwest Lancaster County River Trail in Marietta, PA. Lancaster Recumbent offers rides for all of life's cycles, new and used semi-recumbent and recumbent cycles, offers personal customizations and adaptations to meet your specific needs. Lastly, they offer repairs and maintenance for practically anything with wheels – from recumbent to traditional upright cycles, from strollers to wheelchairs and walkers.<sup>124</sup>

In September 2017, after seven, sometimes controversial, years in the making, Pennsylvania's first large-scale commercial soybean-processing facility was opened at 1609 River Road in Conoy Township. Perdue Agribusiness's new \$60 Million soybean-processing plant has been long touted by Perdue as a boon to farmers from Lancaster County and the region, saving them transportation costs. The plant has received strong endorsement from local agriculture and business groups.<sup>125</sup> The state gave Perdue an \$8.75 million grant to build the plant in Pennsylvania. With processed water coming from the adjacent Lancaster County Waste-To-Energy Facility on the same campus, as well as steam, Perdue AgriBusiness said the plant is the most environmentally friendly soybean plant in the country. Perdue said the facility would have the lowest rate of hexane emissions of any soybean-processing plant in the United States. The plant will process soybeans and turn them into soymeal for livestock and dairy farms. The plant has 35 permanent employees. Perdue said its construction generated 150 jobs and the plant will spawn 500 jobs in crop production and transportation. Gov. Tom Wolf said, "This plant is a game changer for farmers in Pennsylvania, opening new lanes of supply, new markets, and new opportunities in the commonwealth's agricultural economy."<sup>126</sup>

Texas Eastern Pipeline (TETCo) is a major natural gas pipeline which brings gas from the Gulf of Mexico coast in Texas and Louisiana up through Mississippi, Arkansas, Tennessee, Missouri, Kentucky, Illinois, Indiana, Ohio, and Pennsylvania to deliver gas in the New York City area. It is one of the largest pipeline systems in the United States. It is owned by Enbridge. Enbridge connects people to the energy they need to help fuel their quality of life. In the United States alone, more than two million miles of pipelines deliver petroleum and natural gas products. Every year, Enbridge invests in the latest technology and training to meet the high environmental and safety standards our neighbors expect, and to keep pipelines the safest, most efficient and most reliable way to move energy resources.<sup>127</sup> Marietta has its own Compressor Station off River Road and has a direct connection to this major national phenomenon.

### **Biographical Significance & Historic Purpose of Property**

The earliest individual owner that can be traced for this property is a man by the name of Aaron Gable. Mr. Gable had purchased the land from the US Bank in mid-1841<sup>128</sup>. Before the US Bank had the property, it is said that the Marietta & Susquehanna Trading Co./Bank had it<sup>129</sup>. Another source indicates that in the 1830's, the site had a one-story brick dwelling that was later torn down to make way for the mansion that is there today<sup>130</sup>. From newspaper clippings, Mr. Gable appeared to be very active throughout Marietta. Starting back at the farthest date, Aaron Gable shows up in a newspaper clipping under a classified ad of Retailers of Foreign Merchandise certified in York County in 1835, associated with Jacob Kauffelt, Henry Y. Slaymaker & Co<sup>131</sup>. He was appointed as one of fifteen vice presidents of the local democratic chapter in 1844 which rallied their support for politicians James K. Polk, his running VP running mate George M. Dallas, and for governor of Pennsylvania at the time, Francis R. Shunk<sup>132</sup>. He additionally served as one of the Marietta School Directors in 1860<sup>133</sup>.

From Aaron Gable, the property went to Christian Stibgen<sup>134</sup>. Christian Stibgen, in his obituary, was

credited with being involved with many industries, but most notably lumber<sup>135</sup>. In the Lancaster Examiner outlines multiple classifieds sporting Stibgen's name, advertising "Boards, Planks, Shingles, Plastering Laths"<sup>136</sup>. Also, below the ad, is the name of John Frank, a business partner. This partnership appears to be his new business endeavor in 1844, as another clipping in the newspaper from earlier in that year states that Christian Stibgen had been associated with another family lumber company by the name of "Abraham Stibgen & Son", however the partnership of him and his father was dissolved in April of that year<sup>137</sup>. Also in 1844, Christian Stibgen got married to his wife, then Martha Frauch. That marriage occurred in September of 1844<sup>138</sup>. In 1850 Christian Stibgen expands his lumber business when he purchases a coal yard in Lancaster in 1850<sup>139</sup>. The couple came into possession of 3 E. Market Street from Aaron Gable in January of 1862<sup>140</sup>. In 1864, the Daily Evening Express cites the Stibgens as beautifying the building<sup>141</sup>. In 1866 Christian was a member of the Farmers' and Gardeners' Society, where he served on a committee to arrange the articles exhibited for their annual exhibition of the Society. In this committee Stibgen also served with George Mehaffy, another prominent Marietta figure, and someone whom Stibgen was in the lumber/saw mill business with according to his obituary<sup>142</sup>. In 1868 Stibgen was elected a director of the Union National Bank of Mount Joy<sup>143</sup>. Like Aaron Gable, Christian Stibgen was also involved in local elections, and also served as a School Director for Marietta, in 1872<sup>144</sup>.

From the Stibgens, the house fell into the hands of Henry Musselman, a wealthy ironmaster in Marietta<sup>145</sup>. Henry Musselman's earlier life seems to involve less community interaction, however many newspaper clippings as early as 1813 indicate he was a shareholder for most of his life and attended those meetings and held positions in groups such as the "Stockholders of Lancaster"<sup>146</sup>. In 1820, Musselman served as Constable for West-Hempfield township and was among a group of four men tried for manslaughter of Peter Hiestand<sup>147</sup>. Musselman contained two state warrants to arrest him for shooting neighboring cattle, and when Musselman and the others went to take him in, multiple people were wounded including Hiestand, who refused any medical care and died later in prison awaiting trial. The early 1840's saw an uptick in properties owned by Musselman<sup>148</sup>. At least four ads are listed advertising different land for sale on adjacent properties to Musselman, one being a valuable tract of limestone land (1842<sup>149</sup>, 1845<sup>150</sup>), another in 1845 listed as "Chestnut Timber" land<sup>151</sup>. The earliest newspaper accounts of Musselman's properties are a farm owned by Musselman that was denoted to have been struck by lightning in 1804<sup>152</sup>, and another ad for an adjacent property to Musselman's for sale in 1817<sup>153</sup>.

Musselman had operated a freight business prior to 1847, then transitioned into his more well-known role as Ironmaster when he built Furnaces No. 1 & No. 2 in 1847 and 1849<sup>154</sup>. The final Furnace under Musselman's dominion was the Musselman Furnace (then changed to Vesta, then Lavino) and that furnace was built in 1867<sup>155</sup>,

<sup>159</sup> Unknown. *3 East Market St. Real Estate Advertisement.*

NUMBER THREE EAST MARKET ST., Marietta, Penna.

Built for a Marietta ironmaster who has three blast furnaces, six farms, Henry Musselman, born in 1798. The recent owners operated the "Forge & Spindle Antiques", shop. The home is zoned commercial and has enormous possibilities. A counting house has been nostalgically restored with open beams and stenciled walls; the grounds are fenced and landscaped, and there is on-property parking. The brick buildings were built in 1850 and are lavishly decorated with cast Iron filigree grillwork.

A double door off the large front porch leads to a vestibule. Inside a spacious hallway connects all rooms. A powder room on first floor. Living room is 15' x 26', with a marble closed fireplace. Dining room 15' x 19' with a marble closed fireplace. A new Crown kitchen 11' x 20', has a walk in cook fireplace. A pantry 7' x 9'. Kitchen vestibule 7' x 7' off a side porch.

The home has been kept primitive, with one gas light remaining. Open stairs. The basement is ground floor daylight, has three rooms and a working walk-in fireplace in servants area. Heating system is oil fired hot water baseboard.

A generous hallway on second and third floors. Bedrooms are 15' x 15', with marble fireplace, 15' x 15' with marble fireplace, 10' x 15 and 11' x 11'. Bathroom is 10' x 15'. Third floor family room, a highlight, is 15' x 26'. Two additional guest bed rooms are 15' x 15' each. Plenty of storage spaces.

The Counting house (brick) first floor 19' x 19', has plaster walls, stenciled and exposed beams, it is approached through a small landscaped formal garden with a ground floor basement, with its large working fireplace it was used for butchering, and garden house. Off the basement of both the home and the counting house is a flagstone & brick patio. The lot is fenced with a cedar privacy fence.

Recent improvements include Crown kitchen, heating system, wiring, floor sanding, new roof, plastering, storm windows, landscaping, domestic hot water, chimneys pointed, room on counting house.

There is a brick smoke house still intact off the counting house, also a two car off-street parking area. The property is insured for \$65,000. Lot size is 35' x 182'. Taxes, School \$197.84. Co. & Boro \$111.05

Asking \$61,500.00 ML#27258

face. I was married in the month of May, 1834, and lodged with my mother-in-law until the month of October in the same year, when my wife and I went to housekeeping on our own account. My mother-in-law then occupied a one-and-a-half story brick tenement, that stood on the corner of Elbow Lane and "Gable's Alley," in the borough of Marietta, Pennsylvania, on the lot next to the present National Bank building. This humble tenement has been long since demolished, and a stately mansion has been erected on its site. Our sleeping chamber was on the first floor, with one window opening towards a garden and one towards the alley. A central door opened into another room on the same floor, from which a door opened towards the street (Elbow Lane) and one towards the garden. This room also had windows in front and in the rear. At that period, and for some months

# CHRISTIAN STIBGEN DEAD.

He Was One of the Best Known Citizens of Marietta.

MARIETTA, Jan. 23 —Christian Stibgen died at his home on Market street, at two o'clock Sunday morning, in his 79th year. Mr. Stibgen's health had been failing for a number of years, but the immediate cause of his death was neuralgia of the heart. He was born at Roseville, this county, November 11, 1820, and was the eldest son of the late Abram Stibgen. He came to Marietta with the family in 1835, and on September 3, 1844, he was married here to Miss Martha Franck, a sister of Mrs. I. S. Geist, who survives him, together with one son, George F. Stibgen, manager of Marietta Casting company, and a daughter, Emma M. Stibgen, residing at home.

In his younger years Mr. Stibgen was a man of a progressive nature, and was engaged in a number of different pursuits. From 1850 to '56 he was manager of the Clark & Zell coal yard in this place, and in the latter year was sent by the firm to Gordonville, this county, where he started and managed a coal yard for them for two years. He then took charge of the Gordonville machine works, and managed that enterprise for two years. After this he returned to Marietta and engaged in the coal business, in which enterprise he remained for a number of years. Later he assumed the management of the Duffy & Meheffay saw mill, and from this was placed in charge of the late Col. Duffy's farm, which position he retained until his retirement from active life, some years ago. He was at different times a member of the council and school board of this borough.

At the breaking out of the civil war Mr. Stibgen's age exempted him from the draft, but his patriotism prompted him to furnish a substitute in his stead, which he did. It may be mentioned here that there were but two soldiers furnished from Marietta in this way, the other one was provided by Miss Annie Reinhart, a sister of Mrs. George W. Meheffay.

Mr. Stibgen during his time built a number of fine residences in town, among them being those occupied at present by Dr. E. D. Graves, Cyrus A. Herr, Prof. I. S. Geist and the Episcopal parsonage.

He was a life-long member of the M. E. church and took an active interest in its affairs.

The funeral will be held Tuesday from his late residence, with interment in Marietta cemetery. Services will be conducted by Rev. O. W. Haddaway, of the M. E. church.
